

**512. Health Behavioral Science III**  
Spring. 2 to 5 credits. 511 or approval of department.

The diagnosis and treatment of various forms of deviant behavior, i.e. alcoholism, neuroses, character disorders, sexual deviations, schizophrenia, affective psychoses, organic and psychosomatic conditions, and mental subnormality. Preceptorship in community mental health.

**513. Health Behavioral Science IV**  
Summer. 2 to 5 credits. 512 or approval of department.

Community-based health surveys. Continuation of preceptorship in community mental health.

**514. Health, Medical Care, and Society I**

Fall. 2 to 5 credits. 513 or approval of department.

A historical review of medical care programs in the United States. Introduction to health care organization and delivery; health care facilities and financing of medical care; comparative health care systems. Manpower development and utilization; politics of health care; elements of community health planning. Practica on health care agencies and programs.

**515. Health, Medical Care, and Society II**

Winter. 2 to 5 credits. 514 or approval of department.

Continuation of 514. Medical economics and finance for the general practitioner. Principles of medical management. Field placements with health care agencies and programs.

**516. Health, Medical Care, and Society III**

Spring. 2 to 5 credits. 515 or approval of department.

Clerkship in community medicine. Consideration is also given to patient care issues. Practical problems of health care delivery are analyzed which occur in clerkship. Some issues are explored directly with the principal parties involved.

**517. Health, Medical Care, and Society IV**

Summer. 2 to 5 credits.

Community-based studies of health care delivery systems.

**620. Directed Studies in Community Medicine**

Fall, Winter, Spring, Summer. 1 to 6 credits. May re-enroll for a maximum of 24 credits. Approval of department.

Individual projects on special problems related to community medicine.

## COMPUTER SCIENCE CPS

### College of Engineering

**110. Introduction to Computer Programming**

Fall, Winter, Spring, Summer. 3(3-0)

Students may not receive credit in both 110 and 120.

FORTRAN programming, number systems and basic computer structure. Applications from various areas including business and social science.

**120. Computer Programming for Engineers and Scientists**

Fall, Winter, Spring, Summer. 3(3-0) MTH 111 concurrently. Students may not receive credit in both 110 and 120.

FORTRAN programming, number systems and basic computer structure. Applications from engineering, mathematics and physical science.

**124. APL-Computer Programming for Scientists**

Fall, Winter, Spring. 3(3-0) LBC 112 or concurrently. Interdepartmental with and administered by Lyman Briggs College.

APL programming; interactive programming techniques; arithmetic, logical, and extended APL operators; functions, applications to concurrent topics in mathematics; principles of operators of time-shared computers.

**130. Computers in Society**

Fall. 3(2-1)

A non-technical introduction to computers, programming, applications and to the computer revolution. Topics: automation, data banks, privacy, the engineered society.

**255. Computer Models in Science and Engineering**

Spring. 3(3-0) 110 or 120 or equivalent FORTRAN. Interdepartmental with and administered by the Mechanical Engineering Department.

Problem-solving; development of student's ability to formulate computable models based on finite physical elements, examples from statics, dynamics, electrical resistance, and conduction heat transfer.

**295. Independent Study**

(290.) Fall, Winter, Spring, Summer. 1 credit. May re-enroll for a maximum of 4 credits in 295 and 495 combined. Approval of department.

Independent undergraduate research in computer science.

**300. Computer Programming**

Fall, Winter, Spring, Summer. 3(3-0) 110 or 120; MTH 108 or 111.

Development and implementation of numeric and non-numeric algorithms using FORTRAN. Number systems and representations of data. Concepts of storage, processors and compilers.

**305. List Processing Languages**

Winter. 3(3-0) 300 or approval of department.

Development and implementation of computer programs in string and list processing languages. Emphasis upon non-numeric applications. Structure of a simple list processing language. Comparison of list processing languages.

**306. COBOL Programming**

Spring. 3(3-0) 110 or 120.

The mechanics of COBOL, a business data processing language; presented with illustrative problems.

**311. Assembly Language and Machine Organization**

Fall, Winter. 4(3-1) 300. MTH 113 or concurrently, or approval of department.

Machine structure, registers and operations. Programming in assembly language. Discrimination of assembler, loader and execution tasks. Comparison with interpretive processing. Introduction to program and data structures. Subprogram linkage.

**312. Generative Coding and Information Structures**

Winter, Spring. 4(3-1) 311. MTH 214 or concurrently or approval of department. Macro facilities, conditional assembly, interaction with monitor, assembly language I/O. Use of buffer, stack, queue, deque, tree and list data structures. Interpreters, recursive routines.

**313. Introduction to System Programming**

Fall, Spring, Summer. 4(3-1) 312.

Loaders and operating systems. Study of existing batch and time-sharing systems. Design and implementation of part of an operating system. Segments, overlays, multi-processing and multi-programming.

**321. Introduction to Discrete Structures**

Fall, Winter. 3(3-0) 300, MTH 113.

Set operations, relations, functions and mappings. Boolean algebra, Boolean matrices, truth tables, minimization. Propositional and predicate calculus, well formed formulas, precedence relations, quantifiers. Applications to computer science.

**322. Introduction to Theory of Computing**

Winter, Spring. 3(3-0) 321, MTH 215 or 334.

Finite-state machines, stack automata, Turing machines. Effective procedures and computability. Introduction to recursive functions. Symbol manipulation systems.

**341. Computer Aided Manufacturing**

Spring. 4(3-2) 110 or 120. Interdepartmental with and administered by the Department of Mechanical Engineering.

Numerical control, Computer-Aided Numerical Control, Direct Numerical Control, and adaptive control applied in present day manufacturing. Use of the APT language to control NC machines.

**411. Information Theory**

Winter. 3(3-0) 110 or 120; 322 recommended; STT 351 or 441.

Measures of information content and flow. Channel capacity and theoretical limits on information transmission. Applications to coding and computer related studies.

**421. Combinational Circuits**

Fall. 3(3-0) 311 and 321 or approval of department.

Combinational circuits. Minimization, multiple output, NAND-NOR implementation and iterative circuits.

**422. Sequential Circuits**

Winter. 3(3-0) 322 or approval of department, 421.

Synchronous and asynchronous machines. Boolean equations, state minimization, races and hazards. Regular expressions, Moore and Mealy models.

**423. Computer Architecture**

Spring. 3(3-0) 422.

Computer arithmetic algorithms, memory systems, computer design, input-output system design, digital system simulation.

**447. Digital Filtering**

Spring. 3(3-0) 300, MTH 215.

Background. Sampling theorems. Discrete linear systems. The digital filter. Digital filter design. Discrete Fourier transforms. Applications and generalizations.

**Descriptions — Computers Science  
of  
Courses**

**451. Design of Language Processors I**  
Fall. 3(3-0) 313 or concurrently, 322.

Relation between languages and automata. Properties of grammars. Lexical analysis and symbol-table management. Syntactic analysis using top-down parsing, precedence, LR(k) and LL(k). Preliminary design of a compiler.

**452. Design of Language Processors II**  
Winter. 3(3-0) 451.

Continuation of 451. Semantics and generation of intermediate code. Pragmatics of code optimization, register allocation and machine code generation. Macro facilities, compiler generators and interpreters. Implementation of designed compiler.

**453. Design of Language Processors III**  
Spring. 3(3-0) 452.

Continuation of 452. Readings from the current literature. Completion of compiler project.

**490. Selected Topics**

Fall, Winter, Spring, Summer. 3(3-0)  
May re-enroll for a maximum of 9 credits if a different topic is taken. Approval of department.

A new developing area of computer science selected by the department.

**495. Independent Study**

Fall, Winter, Spring, Summer. 1 credit. May re-enroll for a maximum of 4 credits in 295 and 495 combined. Approval of department.

Independent undergraduate research in computer science.

**801. Special Problems**

Fall, Winter, Spring, Summer. 1 to 4 credits. May re-enroll for a maximum of 8 credits. Approval of department.

**805. Clustering and Scaling Algorithms**

Fall. 3(3-0) 300, STT 441 or approval of department.

Algorithms that organize large amounts of data. Includes metric clustering, hierarchical clustering and multi-dimensional scaling.

**810. Introduction to Linear System Theory**

(812.) Fall. 3(3-0) MTH 214. Interdepartmental with Systems Science and Social Science (College of) and administered by Systems Science.

A first course in system theory for students from a range of disciplines. Mathematical representation of system variables, transform and state space method of analysis, introduction to control theory, applications to physical, economic and social systems.

**811. System Methodology and Simulation**

Winter. 3(3-0) 810, STT 441. Interdepartmental with Systems Science and Social Science (College of) and administered by Systems Science.

Problem definition, design of abstract models for system design and control, simulation of systems described by differential and difference equations, generation of random variables, simulation of discrete object stochastic systems, simulation languages, applications to physical, economic and social systems.

**813. System Project**

Spring. 3(1-6) 811. Interdepartmental with Systems Science and Social Science (College of) and administered by Systems Science. Individual or team application of simulation methods to system design and/or management.

**817. Nonparametric Pattern Recognition**

Winter. 3(3-0) 300, STT 441, MTH 334.

Nonstatistical approach to pattern recognition. Discriminant functions, optimization techniques, feature extraction, non-parametric learning and algorithms for recognition. Error analysis.

**818. Parametric Pattern Recognition**  
Spring. 3(3-0) STT 442, MTH 334.

Decision-theoretic approach to pattern recognition using decision rules, parameter estimation, suboptimum strategies, optimum strategy without learning, learning and sequential recognition.

**825. Theory of Combinational Circuits**  
Fall. 3(3-0) 423 or approval of department.

Switching algebra and related group and lattice theory; decomposition; the synthesis of multiple-output switching functions using multi-level combinational circuits.

**826. Theory of Digital Machines**  
Winter. 3(3-0) 825.

Sequential machines; machine specification in terms of states and transitions; decomposition; state minimization and assignment.

**827. Switching Theory**

Spring. 3(3-0) 826.

Asynchronous and speed independent circuits; static and dynamic hazards; use of race conditions.

**831. Mathematical Theory of Formal Languages I**

Fall. 3(3-0) 453 or approval of department.

Definition of grammars; recursive and recursively enumerable sets; decidability and undecidability; regular sets; linear languages and context-free languages.

**832. Mathematical Theory of Formal Languages II**

Winter. 3(3-0) 831.

Context-sensitive grammars; scattered context grammars; closure properties of languages; abstract families of languages; derivation restricted grammars.

**841. Artificial Intelligence and Adaptive Systems I**

Winter of odd-numbered years. 4(4-0) 300, STT 441.

Foundations of heuristic methods; syntactic means-end analysis; semantic means-end analysis; adaptive systems.

**842. Artificial Intelligence and Adaptive Systems II**

Spring of odd-numbered years. 4(4-0)

841. Computer representation of information from natural languages; representation of two and three dimensional environments; theory of design of robots; future trends.

**861. Structured Programming**

Fall. 3(3-0) 322; 313 or concurrently.

Block structured languages, control structures and mathematical foundations of structured programming; program development by step-wise refinement; proving program correctness; extensive readings from the current literature.

**862. Advanced Data Structures**

Winter. 3(3-0) 313; 322 or concurrently.

Structured data types; recursive and structured data structures and semantics; hierarchical program structures; models for programming languages; extensive readings from the current literature.

**863. Structured Multiprogramming Systems**

Spring. 3(3-0) 313; 322 or concurrently.

Advanced software techniques for computer operating systems. Term project to design, implement and analyze an operating system using quality structured program construction.

**899. Research**

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

**911. General Automata Theory I**

(E E 981.) Fall of odd-numbered years. 3(3-0) 423 or SYS 827 or approval of department. Interdepartmental with Electrical Engineering.

Characterization of machines and programs as automata; mathematical decomposition of finite automata.

**912. General Automata Theory II**

(E E 982.) Winter of even-numbered years. 3(3-0) 911. Interdepartmental with Electrical Engineering.

Reliability and redundancy of finite automata. Probabilistic sequential machines. Languages definable by probabilistic and deterministic automata. Axioms for equivalence of regular expressions.

**913. General Automata Theory III**

(E E 983.) Spring of even-numbered years. 3(3-0) 912. Interdepartmental with Electrical Engineering.

Degrees of difficulty of computation. Models of parallel computation. Iterative automata.

**999. Research**

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

**CRIMINAL JUSTICE C J**

**College of Social Science**

**110. Introduction to Criminal Justice**

Fall, Winter, Spring. 3(3-0)

Survey of agencies that compose the system: primarily the police, courts and corrections. Also, the processes of these components and their relationships, as well as related agencies involved are examined.

**235. Criminology**

Winter, Spring. 4(4-0) SOC 241 or C J 110 or approval of school. Interdepartmental and jointly administered with the Department of Sociology.

Crime analysed from sociological perspective: meaning of "crime", crime statistics, and measurement, theories of crime causation, crime typologies, e.g., professional organized, violent, sex, white-collar crimes, juvenile delinquency.
