

921. Pathology of Nutritional and Metabolic Diseases
Summer of even-numbered years. 4(3-2) Approval of department; PTH 404 or ANT 420. ANS 525, BCH 452, HNF 462 recommended. Interdepartmental with the departments of Large Animal Surgery and Medicine, Animal Husbandry and Pathology.
Development, physiopathology and morphologic pathology of nutritional and metabolic diseases including carbohydrate, protein, fatty acid, vitamin and mineral deficiencies, their experimental induction and their medical or economic significance.

926. Comparative Nutrition—Lipids and Carbohydrates
Winter of odd-numbered years. 4(4-0) BCH 452 and a previous course on principles of nutrition. Interdepartmental with the Department of Animal Husbandry.
Regulatory aspects of carbohydrate and lipid metabolism as influenced by nutrition in mammals. Emphasis on normal and abnormal physiological states such as obesity, ketosis and diabetes.

927. Comparative Nutrition—Protein Metabolism and Developmental Biology
Winter of even-numbered years. 4(4-0) BCH 452, PSL 802 or concurrently. Interdepartmental with the Department of Animal Husbandry.
Protein quality assessment, protein status, protein calorie malnutrition, amino acid metabolism, protein turnover, digestion and absorption, hormonal control of protein metabolism, developmental aspects of protein metabolism and growth.

928. Comparative Nutrition—Minerals
Spring of even-numbered years. 3 credits. BCH 452, PSL 802. Interdepartmental with and administered by the Department of Animal Husbandry.
Forms and location in body, metabolic roles, deficiency and toxicity signs, interrelationships, requirements and biological availability of sources.

929. Comparative Nutrition—Vitamins
Spring of odd-numbered years. 3(3-0) BCH 452 and a previous course on principles of nutrition. Interdepartmental with and administered by the Department of Animal Husbandry.
Chemical and physical properties, standards of activity, occurrence, metabolic roles, antivitamin deficiencies and toxicity signs, requirements and factors affecting requirements.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FORESTRY FOR

College of Agriculture and Natural Resources

In 305, 306, 402 and 430, field trips are scheduled for several consecutive days away from the campus for integrated field experience, primarily in the second half of spring term of the junior year, so that these courses must be taken concurrently. This precludes enrollment in other courses during that term. The approximate cost of these field trips is \$200.

IDC. Resource Ecology and Man
For course description, see Interdisciplinary Courses.

202. Introduction to Forestry
Fall, Spring. 3(3-0)
Forestry in its broadest sense, including: historic development, forest growth, protection and management, products, national and world economy and policy. Emphasis on multiple use concepts. One-day field trip required.

204. Forest Vegetation
Fall, Spring. 5(3-4) BOT 205 or approval of department.
Nomenclature, classification, and identification of important trees, shrubs, and herbaceous plants of forest and field.

220. Plants and Their Environment
Winter. 3(3-0) Intedepartmental with Natural Resources.
Fundamental ecological relationships between various climatic, edaphic and biotic environmental factors of the ecosystem and plant response, including structure, function and evaluation of species.

301. Quantitative Methods for Natural Resources
Winter. 4(3-2) MTH 109 or MTH 111.
Collection and analysis of information pertaining to natural resources. Survey design, field procedures, equipment, and analytical techniques.

304. Forest Ecology
Fall. 4(3-3) FOR 204; BOT 205.
The forest is viewed as a biological community. Forest site relationships are quantified by examining the existing physical environment and relating it to the forest species occupying that community.

305. Silviculture
Spring. 4(3-3) FOR 204, FOR 304. Must be taken concurrently with FOR 306, FOR 402 and FOR 430.
Natural and artificial forest reproduction methods; intermediate stand treatments; non-timber aspects of silviculture; field studies of silvicultural methods. Extended field trips required.

306. Forest Fire Protection and Use
Spring. 3(2-3) Juniors or approval of department. Must be taken concurrently with FOR 305, FOR 402 and FOR 430.
Causes and effects of forest fires. Combustion, fire behavior and fire weather. Prevention and control planning and techniques. Fire in forest land management. Extended field trips required.

309. Wood Technology
Fall. 4(3-3)
Structure of wood. Mechanical and physical properties of wood. Wood anatomy and relation to growth.

402. Forest Inventory
(302.) Spring. 4(2-4) FOR 301. Must be taken concurrently with FOR 305, FOR 306 and FOR 430.

Field and office techniques of forest inventory, with primary emphasis on timber resources. Extended field trips required.

409. Forest Hydrology
Fall. 3(3-0) CSS 210.
Hydrologic cycle, with emphasis on soil, water and ground water regimes; instrumentation and measurement of the various components. Effects of forest management on watersheds and water yields.

410. Forest Tree Improvement
Fall. 3(2-2)
Distribution of genetic variation in natural tree populations. Introduction, selection, progeny testing, species hybridization, and polyploidy to obtain superior tree populations.

411. Tree Physiology
Winter. 3(3-0) BOT 301.
The fundamental principles of plant physiology with particular reference to the growth and development of woody plants, and consideration of the influence of genetic and environmental factors on physiological processes in trees.

424. Forest Soils
Spring. 4(3-3) FOR 220 or FOR 304, CSS 210. Interdepartmental with the Department of Crop and Soil Sciences.
Interrelationships of forest site and the growth of forests. Classification and productivity of forest soils. Effects of silvicultural and forest management practices on the soil. Two-day field trip required.

430. Timber Harvesting and Utilization
Spring. 4(3-3) FOR 309. Must be taken concurrently with FOR 305, FOR 306 and FOR 402.
Felling and bucking trees. Log transportation. Log and lumber grades. Sawmill practices. Wood working machinery. Gluing wood, manufacture of pulp, plywood and other board products. Extended field trips required.

431. Finishing, Preservation and Drying of Wood
Winter. 3(3-0) FOR 309.
Properties, selection, application of decorative and protective coatings, wood preservatives and fire retardants. Air and kiln drying of lumber.

432. Methods in Wood Science
Spring. 3(2-2) FOR 309, FOR 431.
Application of standard laboratory testing procedures to the evaluation of basic properties of solid wood and wood products. Laboratory exercises in wood microtechnique and wood finishes.

435. Law and Resources
Spring. 3(3-0) R D 417 or BOA 440. Interdepartmental with and administered by the Department of Resource Development.
Legal theories, cases, statutes and constitutional considerations are applied to natural resource utilization. Private and public property interests in natural resources are illustrated through case studies of use conflicts.

- 446. Range Management**
Winter. 4(4-0) FOR 220 or FOR 304 or approval of department.
 Development of range industry; grazing regions and reconnaissance; planning multiple-use management on forest range and watershed.
- 450. Natural Resource Administration**
Fall, Spring. 4(4-0) Seniors. Interdepartmental with the departments of Fisheries and Wildlife, Park and Recreation Resources and Resource Development and Natural Resources.
 Concepts and methods of administering wildlife properties. The legal, economic and social environment. Benefit-cost analysis of management changes. Unit organization, personnel management and accounting. Presents a systems view of administration.
- 454. World Forestry**
Winter. 3(3-0)
 Forest resources, forestry practices, and the forest economy throughout the world.
- 455. Natural Resource Economics**
Winter. 4(4-0) FOR 450 or approval of department. Interdepartmental with the departments of Fisheries and Wildlife, Park and Recreation Resources, Resource Development, and Natural Resources.
 Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.
- 457. Forest Management and Planning**
Winter. 4(3-2) FOR 455 or concurrently.
 Integrative planning for forest management, including multiple-use aspects. One-day field trip required.
- 460. Arboriculture**
Fall. 3(2-3) Approval of department.
 Principles and techniques of species selection, establishment, and cultural practices used in the care and maintenance of shade and ornamental trees. Two-day field trip required.
- 461. Urban Forestry**
Spring. 3(3-0) FOR 460 or approval of department.
 Principles of urban forest management: organizational, legal, economic, cultural and environmental. Inventories, utility forestry and commercial arboriculture. Field trips required.
- 465. Forest and Wood Science Problems**
Fall, Winter, Spring, Summer. 1 to 5 credits. Seniors with a 2.80 average, or approval of department.
 Special problems course for students qualified for advanced study in some phase of forestry or wood science.
- 491. Natural Resources and Modern Society**
Spring. 3(3-0) Juniors. Interdepartmental with the Department of Resource Development and Natural Resources.
 A survey of the social and economic significance of natural resources in modern industrial and urban society. Current problems of natural resources management and use are examined in terms of the society in which they exist.
- 804. Forest Ecology**
Winter. 3(3-0) Approval of department.
 Theories, methods of analysis, and discussion of current investigations of energy, nutrients, and biomass dynamics in forest ecosystems.
- 807. Special Problems**
Fall, Winter, Spring, Summer. 2 to 5 credits. May reenroll for credit with a maximum of 10 credits. Approval of department.
 Advanced study in administration, biometrics, photogrammetry, dendrology, silviculture, management, economics, ecology, genetics, arboriculture, hydrology, soils, recreation, physiology, policy, entomology, products harvesting, wood preservation, timber mechanics, wood conversion, fire, range management, extension and pathology.
- 809. Natural Resources Economics**
Winter. 3(3-0) Approval of department. Interdepartmental with the Department of Resource Development.
 Applications of economic analysis to natural resource problems.
- 828. Seminar**
Winter. 1(1-0)
 Critical study and discussion of advanced forestry topics.
- 830. Physiological Genetics**
Winter. 3(3-0) Approval of department. Interdepartmental with the Department of Crop and Soil Sciences.
 Physiological bases for genetic variation in higher plants including adaptive physiology, quantitative genetics, growth correlations, biochemical genetics, hybrid physiology, and genealogy.
- 835. Silviculture**
Fall. 3(3-0) FOR 305 or approval of department.
 Biological basis of intensive forest management including seedling production, site evaluation and preparation, plantation establishment, intermediate stand treatments and natural reproduction methods. Field trip optional.
- 840. Recreation Economics**
Spring. 4(4-0) FOR 809 or approval of instructor. Interdepartmental with the departments of Park and Recreation Resources and Resource Development and administered by the Department of Park and Recreation Resources.
 Applications of economic analysis to recreation resource problems including measurement of demand and supply, valuation of recreation resources, determination of economic impact, economic decision making and policy considerations.
- 850. Administering the Public Land Agency**
Spring. 4(4-0) FOR 450 or approval of department.
 Case studies of administrative problems in land management agencies. Students are organized as teams and prepare team reports on specified aspects of each case.
- 855. The Research Process in Natural Resources**
Fall. 3(3-0) Approval of department. Interdepartmental with and administered by the Department of Resource Development.
 Research and decision processes as applied in natural resource investigations. Research organization and applications of research results. Oriented to management, social science, and policy studies. Preparation of project proposals.
- 860. Forest Inventory**
Fall of even-numbered years. 3(3-0) FOR 402, STT 422, MTH 112.
 Literature based study of the state of the art and current research topics in methods of forest inventory. World-wide in scope, but emphasis on North American systems.
- 899. Research**
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
- 909. Timber Economics**
Fall of odd-numbered years. 3(3-0) FOR 457, FOR 809, EC 800, EC 801, EC 802.
 Economic theory relevant to study of timber production, regional and national timber supply, demand and price, the effect of institutional factors, and other topics by review of past research.
- 910. Resource Economics Proseminar**
Spring. 3(3-0) May reenroll for a maximum of 9 credits. Approval of department. Interdepartmental with the departments of Agricultural Economics and Resource Development.
 A seminar wherein advanced graduate students in the fields of resource economics participate with faculty in the joint conduct of a major research project in resource economics and policy.
- 960. Simulation Models in Natural Resource Management**
Winter of odd-numbered years. 3(3-0) RD 855 and knowledge of FORTRAN programming or approval of department. Interdepartmental with and administered by the Department of Resource Development.
 The role of simulation models in developing management strategies. Applications of computer simulation in natural resources. Modeling of decision systems in natural resources management.
- 975. Least Squares Analysis and Linear Programming in Forestry Research**
Fall of odd-numbered years. 4(4-0) MTH 112, STT 423, CPS 110 or CPS 120.
 Application of least squares analysis and linear programming to problems in forestry research. Include both linear and nonlinear least squares models. Case studies from several forestry disciplines.
- 976. Multivariate Methods in Forestry Research**
Winter of even-numbered years. 4(4-0) FOR 975 or approval of department.
 Application of multivariate techniques such as principal components, canonical analysis, factor analysis, and clustering to problems in forestry research. Case studies drawn from several forestry disciplines.
- 999. Research**
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
