

990C. Field Experience: Special Education
Spring. 3 to 12 credits. May reenroll for a maximum of 18 credits. Approval of department.
Supervised graduate practicum in special education teacher training.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

ELECTRICAL ENGINEERING AND SYSTEMS SCIENCE

College of Engineering

Electrical Engineering E E

275. Consumer Electronics
Fall, Winter, Spring. 3(3-0)
Electronic circuit components and devices; their operation in transmitters, receivers, stereoamplifiers, etc. Electronic measurements, magnetic recording, speaker systems, and other topics will be considered.

300. Electric Circuits I
Fall, Winter. 4(4-0) MTH 113.
Current voltage and power. DC and transient circuit analysis. Forced response. Sinusoids and the phasor concept. Bridges.

301. Electric Circuits II
Winter, Spring. 4(4-0) E E 300, MTH 214.
Sinusoidal steady-state response. Average power and rms concepts. Complex frequency response. Magnetically coupled circuits. Two-port networks. Transfer functions.

302. Basic Electronic Circuits
Spring, Summer. 4(4-0) E E 301, MTH 215.
Volt-ampere characteristics of diodes and transistors. Voltage, current and power amplification. Stability, transient and high-frequency effects. Feedback, oscillators and operational amplifiers.

303. Electronics Laboratory I
Winter, Spring. 1(0-3) E E 300; E E 301 concurrently.
Electronic test equipment and measurement fundamentals. Experimental verification of topics covered in E E 300 and E E 301. Computer-aided circuit analysis and design.

304. Electronics Laboratory II
Fall. 1(0-3) E E 302.
Experimental verification of topics covered in E E 302. Single-stage and multi-stage transistor amplifier design and analysis. Applications of linear integrated circuits. Computer-aided circuit design.

305. Electromagnetic Fields and Waves I
Fall, Winter. 3(3-0) MTH 310, PHY 288.
Vector analysis, Electrostatic fields; EM sources, scalar potential, Poisson's and Laplace's equations, dielectric media, capacitance, and energy storage. Boundary value problems for electrostatic fields.

306. Electromagnetic Fields and Waves II
Winter, Spring. 3(3-0) E E 305.
Magnetostatic fields; EM sources, vector potential, magnetic media, inductance, and energy storage. Time-varying fields and Maxwell's equations; energy conservation, potential theory, and EM boundary-value problems.

307. Electromagnetic Fields and Waves III
Spring, Summer. 3(3-0) E E 306; E E 308 concurrently.
Application of Maxwell's equations; radiation, propagation, reflection, and power flow of plane EM waves; EM boundary value problems. Transmission line theory: transient and steady state waves, standing and traveling waves, reflections and standing-wave-ratio.

308. Fields and Waves Laboratory
Spring, Summer. 1(0-3) E E 306; E E 307 concurrently.
Experimental investigation of: charged particle motion in EM fields, dielectric and magnetic properties and materials, probing of currents and charges, and propagation of transient and steady-state waves. Digital computer solutions for EM field and wave problems.

345. Introduction to Electronic Instrumentation Systems
Fall, Winter, Spring. 4(3-3) PHY 288.
Basic electronic concepts; passive and active components; operational amplifiers; switching devices, equivalent circuits; transducers; signal conditioning; recording; data management; basic elements of control.

415. Control Systems Design
Winter. 3(3-0) SYS 313. Interdepartmental with Systems Science.
Controller design via root locus and frequency response methods; controllability, observability; state-space design techniques for continuous and computer-controlled feedback systems; survey of digital control.

418. Introduction to Computer-Aided Circuit Design
Spring. 3(3-0) CPS 120, E E 302.
Introduces the techniques used for automatic formulation, analysis and optimization of linear and nonlinear electronic circuits. Students will write a modest but useful analysis program package.

419. Physical Phenomena and Electronic Instrumentation I
Winter. 4(3-3) PHY 289, PHY 298 or approval of department, MTH 215. Interdepartmental with and administered by the Department of Physics.
Concepts of electronics relative to uses in investigations of physical phenomena and their subsequent applications to provide reliable instrumentation. Nuclear radiation detectors, photometers and magnetometers are examples of specific topics covered.

420. Electromechanical Energy Conversion
Winter. 3(3-0) E E 301, E E 305.
Review of electromagnetics; design, specification, and use of d.c. machines in industrial and servo-control application, synchronous generators and transformers for power systems; three phase power, per unit notation.

421. Power System Analysis
Spring. 3(3-0) E E 420.
Model of power system components; analysis and planning techniques including load flow, short circuit, transient stability; voltage and frequency control; economic operation of power systems.

430. Digital Electronics I
Fall. 3(3-0) E E 302.
Characteristics and applications of digital integrated circuits. Number systems and Boolean algebra. Gates, flip-flops, clocks, counters, shift registers, A/D and D/A converters. Basic applications of these devices.

431. Digital Electronics II
Winter. 3(3-0) E E 430 or CPS 421.
Basics of minicomputer and microcomputer based systems. Programming fundamentals. The I/O bus. Interfacing, data acquisition, data storage, and data communication. Practical design problems.

433. Digital Electronics Laboratory
Winter, Spring. 1(0-3) May reenroll for a maximum of 2 credits. E E 431 or concurrently.
Design, construct and test representative digital electronic circuits. Hands-on experience with minicomputer, microcomputers and programmable calculators. Applications in data acquisition and control.

435. Guided Transmission Systems
Fall. 3(3-0) E E 307.
Guided wave theory; normal modes, propagation characteristics in rectangular and circular waveguides. Stripline and microstrip. Electromagnetic resonators; frequency and Q. Circuit theory of waveguiding systems. Scattering matrix; system applications.

436. Radiation and Propagation of Electromagnetic Waves
Winter. 3(3-0) E E 307.
Radiation, propagation, scattering and reception of electromagnetic waves; circuit and radiation characteristics of wire and microwave and antennas; radiation fields, self and mutual impedances of antennas and arrays; microwave aperture antennas.

438. Transmission and Radiation Laboratory
Winter. 1(0-3) E E 435; E E 436 concurrently.
Microwave transmission and radiation laboratory. Measurement of frequency, wavelength, standing waves, impedance, and power. Experiments on transmission lines, waveguides, cavity resonators, microwave circuits, and circuit and radiation properties of antennas.

455. Deterministic Communication Systems
Fall. 3(3-0) Approval of department.
Communication systems. Representation of signals in time and frequency domain. Processing of signals by linear, simple nonlinear and time-variant systems. Linear and nonlinear, analog and digital modulation and demodulation; for example, AM, FM, PCM.

456. Applied Probability in Communication Theory
Winter. 3(3-0) E E 455 or approval of department.
Probability theory applied to communications. Representation of random signals as stochastic processes. Autocorrelation and spectral density. Noise in components and systems, performance of analog linear and nonlinear systems with noise.

Descriptions – Electrical Engineering and Systems Science

of

Courses

- 457. Statistical Communication Systems**
Spring. 3(3-0) E E 456; E E 467 concurrently.
Representation, processing and filtering of random signals. Performance of digital systems with noise. Optimal digital communications systems. Signal detection, information concepts, coding. Communication systems such as radar, television, PCM, and telephony.
- 464. Control Systems Laboratory**
Fall. 2(1-3) E E 303 or E E 345; SYS 313. Interdepartmental with Systems Science.
Experimental investigations of feedback systems. Study of solid state controllers. Properties and applications of phase lock loops. Introduction to digital control.
- 467. Communications Laboratory**
Spring. 1(0-3) E E 456; E E 457 concurrently.
Experimental investigations on communication theory and information transmission topics from E E 455, E E 456, and E E 457.
- 474. Physical Principles of Electronic Devices**
Fall. 3(3-0) E E 302; E E 305.
Energy levels in atoms and crystals. Density of states. Fermi-Dirac statistics. Transport properties of bulk materials. Metal-semiconductor contacts. The pn junction, theory, design, and applications.
- 475. Electronic Devices and Circuits I**
Winter. 3(3-0) E E 474.
Analysis and design of devices and circuits based on principles discussed in E E 474. Physical models and operations for BJT's, FET's and other semiconductor devices.
- 476. Electronic Devices and Circuits II**
Spring. 3(3-0) E E 307, E E 475.
Continuation of topics covered in E E 475. Power semiconductor devices, solid state energy-conversion devices. Optoelectronic devices and applications. High-frequency device design, models and applications.
- 477. Electro-optic Devices**
Spring of odd-numbered years. 3(3-0) E E 306.
Atomic origin and the operational characteristics of light sources and detectors. Basic design considerations for gas and solid state lasers. Methods of optical detection, applications.
- 480. Integrated Circuits: Operational Amplifiers**
Spring. 3(3-0) E E 302.
Integrated circuits: design principles and fabrication. Differential-amplifier stage signal characteristics. Properties and models of operational amplifiers. Applications: signal conditioners, signal processors, signal generators, and special-purpose circuits.
- 484. Electronic Devices Laboratory**
Winter. 1(0-3) E E 475 concurrently.
Measurement of semiconductor bulk properties. Device fabrication. Experimental study of selected electron devices and design application based on principles discussed in E E 474 and E E 475.
- 490. Special Topics in Electrical Engineering**
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.
Exposition of special topics in electrical engineering.
- 495. Independent Study**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 3 credits in E E 495 and SYS 495 combined. Approval of department.
Independent study of a topic in electrical engineering of particular interest to the student.
- 499. Undergraduate Research**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 6 credits in E E 499 and SYS 499 combined. Approval of department.
Independent undergraduate research in contemporary areas of electrical engineering such as: alternative energy, monitoring and control, bioengineering, power systems, integrated electronics, electromagnetic systems.
- 801. Special Problems**
Fall, Winter, Spring, Summer. 1 to 4 credits. Approval of department.
Investigation of a topic in electrical engineering compatible with the student's prerequisites, interest, and ability.
- 811. Noise and Fluctuation Phenomena**
Spring of even-numbered years; Summer of odd-numbered years. 3(3-0) Approval of department.
Nyquist formulation of thermal noise; noise phenomena associated with electron tubes, transistors, beam and parametric devices, amplifiers, mixers, and detectors; techniques and equipment for noise measurements.
- 822. Electric Energy System Theory**
Fall. 4(4-0) E E 421, MTH 334, SYS 313.
Analysis, control, and operation of electric power systems. Models of generators, transformers, and transmission lines; voltage and automatic generation control; economic dispatch, load flow, short circuit and stability.
- 831. Active Network Synthesis**
Fall. 3(3-0) Approval of department.
S-domain network synthesis. Root-locus design techniques for practical analog signal processors, including sensitivity and stability considerations. Passive network synthesis and functional properties of operational amplifiers.
- 835. Electromagnetic Theory I**
Fall. 3(3-0) Approval of department.
Electrostatics, magnetostatics, electrostatics, Maxwell's equations, force and energy equations, potential functions. Green's function, radiation of electromagnetic waves, plane waves, cylindrical waves, spherical waves.
- 836. Electromagnetic Theory II**
Winter. 3(3-0) E E 835.
Electromagnetic radiation from simple antennas; analysis of transmitting and receiving systems; propagation of electromagnetic waves in various media; electromagnetic fields in open-wire lines and waveguides.
- 837. Guided Transmission Systems**
Spring. 3(3-0) E E 836.
Discontinuities and impedances in waveguides; equivalent circuits of microwave devices; waveguide excitations; scattering matrix, resonant cavities; microwave circuits.
- 841. Fourier Optics**
Spring of even-numbered years. 3(3-0) E E 455 or E E 880, E E 307 or E E 835.
Electromagnetic (Fourier) optics and optical information processing. Spatial linear systems, EM optics and scalar diffraction; lenses; optical imaging systems; optical information processing; holography.
- 846. Analysis of Random Time Functions**
Winter. 3(3-0) Approval of department.
Mathematical models for time-dependent random phenomena; properties of correlation functions and spectral densities; stationarity and ergodicity; response of linear systems to random inputs; introduction to applied harmonic analysis.
- 847. Communication Systems**
Spring. 3(3-0) E E 846.
Statistical communication theory, vector representation of waveforms; matched filters; detection theory; digital communication systems, PCM, efficient signaling sequences estimation theory; AM and FM, modulation.
- 849. Microwave Electronics**
Spring. 3(3-0) E E 835, E E 875.
Microwave solid-state devices, parametric amplifiers, waves in vacuum and solid-state plasmas, wave amplifiers and oscillators, design of microwave systems.
- 850. Ionized Gases**
Fall. 3(3-0) E E 835 or PHY 448; E E 874. Interdepartmental with the departments of Astronomy and Astrophysics and Physics.
Elastic collision processes; Boltzmann equation; moment equations; motion of a charged particle in electrical and magnetic field; individual and collective charged particle behavior; macroscopic properties of plasmas, waves in the fluid plasma; transport phenomena in plasma.
- 861. Bioelectric Field Theory**
Spring. 3(3-0) E E 306, BME 411.
Volume conductor fields; quasi-static formulation, bioelectric sources, boundary conditions, field of a single cell, subthreshold neuron phenomena, integral equations for biopotentials. Electrocardiography: bioelectric sources in heart, dipole hypothesis, forward and inverse problems.
- 871. Integrated Circuit Engineering**
Spring. 3(3-0) E E 475.
Design, fabrication, and selected applications of silicon, thin film, and thick film integrated circuits. Physics and chemistry of processing, current technologies and limitations. Measurement, testing, and reliability considerations.
- 874. Physical Electronics**
Fall. 4(4-0) Approval of department.
Application of quantum mechanics in solids, band theory of semi-conductors, electrical transport phenomena, induced current concept, charged particle dynamics, electron optics.

- 875. Solid-State Devices and Circuits**
Winter. 3(3-0) E E 874.
Formulation of operating properties and appropriate models of two-terminal and multi-terminal devices formed with semiconductors and solid-state materials. Basic applications.
- 880. Signal Analysis**
Fall. 3(3-0) Approval of department.
Continuous and discrete signals—generation, representation and classification. Fourier transform, spectral analysis and filtering for continuous and discrete signals. Computer implementation of signal processing.
- 899. Master's Thesis Research**
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
- 911. General Automata Theory I**
Fall of odd-numbered years. 3(3-0) CPS 423 or SYS 827 or approval of department. Interdepartmental with and administered by the Department of Computer Science.
Characterization of machines and programs as automata; mathematical decomposition of finite automata.
- 912. General Automata Theory II**
Winter of even-numbered years. 3(3-0) CPS 911. Interdepartmental with and administered by the Department of Computer Science.
Reliability and redundancy of finite automata. Probabilistic sequential machines. Languages definable by probabilistic and deterministic automata. Axioms for equivalence of regular expressions.
- 913. General Automata Theory III**
Spring of even-numbered years. 3(3-0) CPS 912. Interdepartmental with and administered by the Department of Computer Science.
Degrees of difficulty of computation. Models of parallel computation. Iterative automata.
- 926. Antenna Theory I**
Winter of even-numbered years. 3(3-0) E E 837.
Linear antennas; cylindrical dipole antennas as radiating, receiving and scattering elements; current and charge distributions on antennas; electromagnetic fields of antennas; coupled antennas, linear antenna arrays.
- 927. Antenna Theory II**
Spring of even-numbered years. 3(3-0) E E 926.
Microwave antennas; slot antennas; slot wave guide arrays; horn and reflector-type antennas; frequency independent antennas; pattern theory.
- 930. Topics in Solid State Device Research**
Spring of odd-numbered years. 3(3-0) E E 875.
Relationship of solid state theory and material properties to device performance. Topics selected from current device research areas and vary with year. Examples are photovoltaic, amorphous semiconductor, and piezoelectric devices.
- 975. Quantum Electromagnetics**
Winter of odd-numbered years. 3(3-0) E E 874.
Emission, absorption and amplification of radiation; energy levels for optically active materials; kinetic modeling of plasmas and chemically reacting plasmas; rate equation modeling and empty cavity modes of lasers and masers.
- 976. Lasers and Masers**
Spring of odd-numbered years. 3(3-0) E E 975.
Advanced modeling of lasers and masers, quantization of wave fields, line width, multimode phenomena, mode locking, ring and Zeeman lasers, recent developments and applications.
- 989. Waves and Radiations in Plasmas**
Winter of odd-numbered years. 3(3-0) E E 850. Interdepartmental with the departments of Astronomy and Astrophysics and Physics.
Plasma oscillation; interaction, electromagnetic fields with plasmas, wave propagation in magnetonic media; plasma sheath; radiation of electric source in incompressible and compressive plasmas; electroacoustic waves; magnetohydrodynamics; research topics in plasmas.
- 999. Doctoral Dissertation Research**
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
- Systems Science** **SYS**
- IDC. Introduction to Environmental Systems**
For course description, see *Interdisciplinary Courses*.
- 311. Discrete-Time Systems**
Fall, Winter. 3(3-0) MTH 215.
Discrete-time system modeling, discrete-time signals, difference equations, convolution summations, z-transform, transfer functions, stability analysis, digital filters.
- 312. Continuous-Time Systems**
Winter, Spring. 3(3-0) SYS 311.
Response of linear discrete-time systems from transfer functions. Digital filters. Discrete and continuous state-space representation; response of linear systems from state models.
- 313. Analysis of Control Systems**
Spring, Summer. 3(3-0) SYS 312.
Control system characteristics, performance criteria, transient and steady-state responses, error analysis, stability, root locus method, frequency response techniques, gain and phase margins.
- 404. Biological and Ecological Concepts for Engineers and Mathematicians**
Winter. 3(3-0) Approval of department. Interdepartmental with and administered by the Department of Zoology.
Biological and ecological concepts important to formal analysis of living systems, vital properties, processes, and limitations; population dynamics, selection competition, and predation; ecological community structure and function; industrialized ecosystem.
- 410. Systems Methodology**
Winter. 3(3-0) IDC 201, MTH 113, CPS 110 or CPS 120. Interdepartmental with the Department of Engineering.
The systems approach in multidisciplinary large scale problem solving. The development of useful systems analysis tools; systems design; feasibility study; computer simulation for feasibility evaluation.
- 411. Systems Project**
Spring. 2(3-0) SYS 410. Interdepartmental with the Department of Engineering.
Completion of a systems study initiated in SYS 410. The project may involve the design of hardware, simulation of a solution to an interdisciplinary problem, or development of a solution concept.
- 415. Control Systems Design**
Winter. 3(3-0) SYS 313. Interdepartmental with and administered by Electrical Engineering.
Controller design via root locus and frequency response methods; controllability, observability; state-space design techniques for continuous and computer-controlled feedback systems; survey of digital control.
- 442. Systems Concepts for Biologists**
Winter. 3(3-0) Approval of department.
Basic concepts of systems science important to formal analysis and control of biological communities, with emphasis on modeling and on analysis of behavior through numerical solutions.
- 464. Control Systems Laboratory**
Fall. 2(1-3) E E 303 or E E 345; SYS 313. Interdepartmental with and administered by Electrical Engineering.
Experimental investigations of feedback systems. Study of solid state controllers. Properties and applications of phase lock loops. Introduction to digital control.
- 465. Process Optimization Methods**
Fall, Spring. 3(3-0) MTH 215, knowledge of linear algebra. Interdepartmental with and administered by the Department of Chemical Engineering.
Methods for determining optimum design and operating policies of systems of varying complexity. Includes classical methods, mathematical programming and modern methods.
- 475. Introduction to Operations Research**
Winter. 4(4-0) MTH 310, CPS 120. Interdepartmental with and administered by the Department of Agricultural Engineering.
Methodology and basics of operations research; formulation and analysis of probabilistic models of inventory, waiting line, and reliability processes; random process simulation and network planning models.
- 490. Special Topics in Systems Science**
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.
Exposition of special topics in systems science.
- 495. Independent Study**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 3 credits in SYS 495 and E E 495 combined. Approval of department.
Independent study of a topic in systems science of particular interest to the student.
- 499. Undergraduate Research**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 6 credits in SYS 499 and E E 499 combined. Approval of department.
Independent undergraduate research in contemporary areas of systems science.

Descriptions – Electrical Engineering and Systems Science

of

Courses

801. Special Problems
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 8 credits. Approval of department.

810. Introduction to Linear System Theory
Fall. 3(3-0) MTH 214. Interdepartmental with Social Science (College of).

A first course in system theory for students from a range of disciplines. Mathematical representation of system variables, transform and state space method of analysis, introduction to control theory, applications to physical, economic and social systems.

811. System Methodology and Simulation
Winter. 3(3-0) SYS 810, STT 441. Interdepartmental with Social Science (College of).

Problem definition, design of abstract models for system design and control, simulation of systems described by differential and difference equations, generation of random variables, simulation of discrete object stochastic systems, simulation languages, applications to physical, economic and social systems.

813. System Project
Spring. 3(1-6) SYS 811. Interdepartmental with Social Science (College of). Individual or team application of simulation methods to system design and/or management.

814. Advanced System Methodology and Simulation
Spring. 3(3-0) SYS 811.
Simulation of a class of time-varying distributed parameter processes; organization and design of large simulation models; optimization and parameter estimation in large simulation models; applications to economic, social and biological systems; other topics of current interest.

820. System Dynamics and Control
Spring. 4(4-0) MTH 215; knowledge of matrices and Laplace transforms.
Fundamentals of continuous and discrete dynamic control systems; feedback principles; transform and state variable design techniques; introduction to optimal control design.

826. Linear Concepts in Systems Science
Fall. 4(4-0) Approval of department.
State-space and frequency domain models of interconnected systems; solution of continuous and discrete-time linear systems; response characteristics; stability.

827. Nonlinear Concepts in Systems Science
Winter. 4(4-0) SYS 826.
Existence, uniqueness and stability in nonlinear systems; autonomous systems and the phase space; linearization, perturbation, describing functions and harmonic balance procedures; numerical solutions.

835. Nonlinear Optimization Models
(828.) Winter, Summer. 4(4-0) Students may not receive credit for both SYS 835 and MGT 835. CHE 465 or MGT 834 or knowledge of linear programming. Interdepartmental and jointly administered with the Department of Management. Interdepartmental with the Department of Chemical Engineering.
Nonlinear optimization-examples and applications. Kuhn-Tucker Theory. Saddle point optimality conditions. Algorithms for problems with constraints. Unconstrained optimization; introduction to search methods.

838. Feasibility Analysis of Energy Systems
Winter. 3(3-0) STT 441.

Methods for selecting energy conversion and transmission facilities with emphasis on electric utilities. Demand forecasting system reliability; selection of size, type and location of conversion facilities; cost analysis.

841. Optimization of Urban Traffic Flow
Fall of odd-numbered years. 3(3-0)
Approval of department. Interdepartmental with Civil Engineering.

Traffic flow models used in design of computerized traffic control systems. Optimal freeway ramp metering algorithms. Offline and online optimization of traffic signal timing.

843. Ecosystem Analysis, Design and Management
Spring. 3(3-0) SYS 442 or ZOL 404. Interdepartmental with the Department of Zoology.

Groups of students from various biological and nonbiological disciplines will synthesize and analyze models of selected biological systems. Project should yield information relevant to solution of contemporary ecological problems.

851. Modeling of Engineering Systems
Fall. 4(4-0) ME 458 or EE 415. Interdepartmental with and administered by the Department of Mechanical Engineering.

Modeling of engineering devices and components; assembly into systems; bond graph representation; prediction of dynamic behavior by linear, nonlinear and simulation methods; applications to mechanical, electrical, fluid, thermal systems.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

961. Optimal Control Theory I
Fall. 3(3-0) SYS 827, SYS 835 or approval of department; MTH 426.

Formulation of the general control problem; controllability, observability and normality in discrete-state and continuous-state systems; performance functionals; typical control problems.

962. Optimal Control Theory II
Winter. 3(3-0) SYS 961 or approval of department.

Optimum control theory in continuous-state and discrete-state systems; necessary and sufficient conditions for optimal solutions, geometric interpretations relation to calculus of variations; typical applications.

963. Optimal Estimation and Control Theory
Spring. 3(3-0) SYS 962 or EE 847 or approval of department.

Techniques of optimal control and communication theory; development of stochastic control and detection models, state estimation, Kalman filtering, stochastic control, computational methods.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

ENGINEERING

EGR

College of Engineering

1255. Orientation to Engineering Careers
Winter. 2(2-0)

Engineering careers, history and philosophy of engineering profession, present and future challenges, industrial job functions, employment trends.

160. Engineering Communications
Fall, Winter, Spring. 4(1-6) MTH 108 or MTH 111 or concurrently.

Engineering graphics, a means used by engineers to communicate their ideas to others. Freehand sketching, descriptive geometry, and graphical, numerical and computer problem solutions.

161. Mechanical Drawing
Fall, Winter, Spring. 2(0-4)

Lettering and use and care of instruments. Orthographic projection, working drawings, machine sketching and isometric drawing.

162. Mechanical Drawing
Fall, Winter, Spring. 2(0-4) EGR 160 or EGR 161.

Continuation of EGR 161 with emphasis on freehand lettering and sketching, advanced working drawings.

200. Technology, Society and Public Policy
Winter. 3(3-0) Twelve credits from natural science or engineering. Interdepartmental with the Department of Natural Science.

Description and analysis of certain current technologies and their consequences; exploration of avenues for assessing such consequences as an aid to formulation of public policy.

201. Introduction to Engineering Mechanics
Winter. 4(4-0) PHY 237. Interdepartmental with and administered by the Department of Metallurgy, Mechanics and Materials Science.

Laws of mechanics governing the behavior of rigid and deformable bodies emphasizing how these laws influence engineering design. Extensive use of demonstrations.

IDC. Introduction to Environmental Systems
For course description, see Interdisciplinary Courses.

260. Engineering Drawing
Fall, Winter, Spring. 3(0-6)

The development of the ability to communicate graphically, pictorially, and orally. Orthographic projection, freehand sketching, oral reports and creative problem solving techniques are employed to enhance learning.

267. Architectural Drafting I
Fall, Winter, Spring. 3(0-6)
House construction detailing. Analysis and drawing of typical standard details.

270. Computer Graphics
Spring. 3(3-0) EGR 160 or EGR 161; CPS 110 or CPS 120; or approval of department.
Use of computer controlled display systems for the solution of multidimensional problems.
