

Descriptions - CHEMISTRY

of

Courses

958. Seminar in Organic Chemistry

Fall, Winter, Spring. 1(2-0) May reenroll for a maximum of 3 credits. Discussions of recent advances and reports by graduate students on research problems.

985. Statistical Thermodynamics

Winter of even-numbered years. Spring. 3(3-0) May reenroll for a maximum of 9 credits if different topic is taken. Approval of department.

Partition functions, spectroscopic measurements and thermodynamic applications. Nonequilibrium statistical mechanics and thermodynamics. Time correlation functions and spectroscopic lineshapes, light scattering, and magnetic relaxation. Transport properties of fluids and gases.

987. Selected Topics in Physical Chemistry

Fall, Winter. 3(3-0) May reenroll for a maximum of 9 credits if different topic is taken. Approval of department.

Mathematical preparation for quantum chemistry. Selected topics as: kinetics and photochemistry, macromolecular and surface chemistry, molecular spectroscopy, electro and magnetic properties of matter, application of statistical mechanics to chemical problems.

988. Selected Topics in Physical Chemistry

Winter, Spring. 3(3-0) May reenroll for a maximum of 9 credits if different topic is taken. Approval of department.

Topics may be chosen from analysis and interpretation of the spectra of molecules, advanced molecular structure, magnetic resonance, spectroscopy, X-rays and crystal structure, statistical mechanics.

991. Selected Topics in Quantum Chemistry

Fall, Winter. 3(3-0) May reenroll for a maximum of 9 credits if different topic is taken. Approval of department.

Principles of quantum mechanics and application to chemical problems. Selected topics from spectroscopy, properties of atoms and molecules in electric and magnetic fields, and theories of molecular electronic structure.

998. Seminar in Physical Chemistry

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits. Discussions of recent advances and reports by graduate students on research problems.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department. Research in analytical, inorganic, organic, and physical chemistry.

CHINESE

See Linguistics and Oriental and African Languages.

CIVIL AND SANITARY ENGINEERING

College of Engineering

Civil Engineering

C E

251. Elementary Surveying

Fall, Spring. 4(3-3) Not open to majors. Use of the tape, compass, level, and transit with simple maps; traverse closure and area computations. Profile, cross section and stadia surveys, U.S. land system.

252. Surveying I

Fall, Spring. 5(4-3) Engineering majors or approval of department. Instruments, theory of measurements, error analysis, stadia, horizontal and vertical curves, U.S. Public Land System, observation for meridian.

280. Introduction to Environmental Engineering

Fall, Winter, Spring. 4(4-0) CEM 141, or CEM 131, MTH 112, CPS 120. Hydrology; ground water and surface water supply systems; wastewater treatment, methods of pollution control for solid waste, air, and noise.

305. Structural Mechanics I

Winter, Spring. 4(4-0) MMM 211. Stability and determinacy of structures. Two and three dimensional determinate structures. Indeterminate structural analysis by displacement and force methods based upon equilibrium, compatibility and load-deformation relations.

308. Engineering Materials I

Winter, Spring. 4(3-3) MMM 211 or concurrently. Structure; composition; physical, mechanical and rheological properties of non-metallic construction materials. Emphasis on aggregates, asphalt, inorganic cements, concrete, and wood.

311. Urban Utilities

Winter of odd-numbered years. 3(3-0) Capacities, limitations and cost of public and semi-public utilities as they relate to the planning and design of the urban environment. Topics include transportation, water supply, storm drainage, sewage collection and treatment, solid waste and municipal finance.

312. Soil Mechanics I

Spring, Summer. 4(3-3) MMM 211. Engineering properties of soils and their measurement. Effective stress concept; permeability; fluid flow in soils; stress-strain behavior; soil strength; compaction and consolidation of soils; field exploration and design problems.

321. Introductory Fluid Mechanics

Fall, Winter, Spring. 5(4-2) MMM 306. Fluid properties; hydrostatics; control volume approach to conservation of mass, momentum and energy; dimensional analysis and dynamic similitude; fluid resistance; pipe and open channel flows; boundary layer concepts.

342. Survey of Transportation Systems

Fall. 4(4-0) Juniors; not open to majors. Survey of engineering aspects of all forms of transportation with emphasis on highway transportation including highway systems, planning, economic and financial aspects, geometrics and traffic studies.

346. Transportation

Winter, Spring, Summer. 3(3-0) MTH 113. Planning, design and evaluation of transportation systems. Operational characteristics of transportation modes, traffic flow and techniques for system selection.

347. Transportation Facilities

Fall, Winter. 4(3-3) C E 252. Geometric design of highways and airports as these considerations affect capacity, construction costs, financing and safety.

353. Surveying II

Spring. 4(3-3) C E 251 or C E 252. Continuation of C E 252 including photogrammetric methods, astronomical observations for latitude, longitude and meridian. Introduction to geodetic methods.

370. Cost and Optimization Engineering

Fall, Winter. 3(3-0) MTH 113. Formulation of engineering decisions governed by current and future costs and returns. Comparison and optimization of alternative engineering projects, products and processes.

372. Construction Estimating

Fall, Spring. 3(3-0) Juniors. Cost studies of construction activities with emphasis on labor productivity and operating characteristics of equipment under various site conditions. Interpretation of drawings and specifications.

374. Legal Aspects of Engineering

Spring. 3(3-0) Juniors. The professional engineer's relationship with the legal aspects of engineering. Special emphasis on contract documents.

390. Civil Engineering Analysis

Fall, Spring. 4(4-0) MTH 215 and CPS 120. Analysis of civil engineering problems by numerical and statistical methods. Approximate methods and error analysis. Application to computer use.

400. Structural Mechanics II

Fall, Summer. 4(4-0) C E 305. Miscellaneous topics in displacement calculation by virtual work. Matrix formulation of the general principles of framed structural analysis. Exhaustive study of the flexibility and stiffness methods.

405. Structural Design in Steel

Fall, Winter. 4(4-0) C E 305. Beams, columns, tension and compression members, connections. Elastic, plastic and ultimate strength concepts.

406. Structural Design in Concrete

Winter, Spring. 4(4-0) C E 305, C E 308. Reinforced concrete beams, columns, slabs, footings and retaining walls. Elastic theory and ultimate strength concepts. Prestressed theory and design.

- 407. Structural Design Concepts**
Spring. 3(3-0) C E 405, C E 406.
Develop and expand design concepts through study, investigation and project design of various structural systems. Criteria for material selection and creative design of unusual structural systems pursued.
- 410. Structural Mechanics III**
Winter. 4(4-0) C E 400, CPS 120.
Continuation of C E 400. Matrix analysis of framed structures. Introduction to inelastic behavior of structures. Use of programmed computer solution techniques.
- 419. Soil Mechanics II**
Fall, Spring. 4(4-0) C E 312.
Foundation engineering. Immediate, consolidation, and secondary settlements; stress distribution in soil masses; lateral earth pressures on structures; bearing capacity of shallow foundations; introduction to stability analysis of earth structures.
- 421. Hydrology**
Spring. 4(3-2) C E 280, C E 321, C E 390.
Engineering hydrology; frequency and precipitation analysis; streamflow analysis and the unit hydrograph; flood prediction; rainfall-runoff correlations; urban hydrology.
- 422. Hydraulic Systems**
Fall, Winter. 4(3-2) C E 321, C E 390 or M E 351.
Steady flow in pipe networks; open channel flow; turbomachinery; groundwater hydraulics; introduction to unsteady flows. Applications to water supply systems; aquifer analysis; surges and water hammer.
- 441. Highway Operations.**
Fall. 3(3-0) C E 346 or C E 342.
Driver and vehicle characteristics affecting traffic flow; traffic flow density, headway and speed measurements; signing and signal control for efficient intersection operation, parking characteristics and capacity analysis.
- 442. Airport Planning and Design**
Fall, Spring. 4(3-2) C E 346.
The planning and design of the components of the airport system including ground access facilities; aircraft characteristics; the air traffic control system; airport configuration; capacity analysis; management systems.
- 448. Transportation Planning**
Winter. 3(3-0) C E 342 or C E 346.
Urban transportation facilities needs and programs. Design of transportation models for urban highways and public transit including trip generation, trip distribution, mode split and traffic assignment. Transport agencies function and services.
- 449. Highway Engineering**
Spring. 3(3-0) C E 308, C E 347.
Design concepts of roadways, facilities, drainage and pavement design. Maintenance, construction and supervision methods and procedures.
- 471. Scheduling Construction Activities**
Winter. 3 credits. Approval of department.
Techniques for coordinating and controlling construction projects. Scheduling under the constraints of deadlines, uncertain time estimates and limited resources. Computer programs and data files for effective management.
- 481. Water and Wastewater Analysis**
Fall. 4(3-3) C E 280.
Quantitative analysis; bacteriologic and chemical characteristics of water and wastewater; principles of softening, iron removal, coagulation and chlorination; laboratory examination of water and wastewater including turbidity, solids, coliforms, chlorine, etc.
- 483. Water and Wastewater Treatment**
Spring. 4(3-2) C E 280, C E 422. Not open to graduate majors in sanitary engineering.
Water treatment theory and design including sedimentation, coagulation, softening, iron removal and chlorination; wastewater treatment theory and design including grit chambers, activated sludge, trickling filter, and anaerobic digesters.
- 485. Environmental Health Engineering**
Winter. 3(3-0) MPH 200, C E 280, C E 321, C E 390.
Design of small water, waste water and solid waste facilities. Epidemiology of communicable disease transmission by air, water, food and arthropods. Engineering measures to control disease spread.
- 494. Civil Engineering Design Project**
Fall, Winter, Spring. 3(2-2) Seniors, approval of department.
Planning, specifications and design of a civil engineering project or facility.
- 499. Civil Engineering Projects**
Fall, Winter, Spring, Summer. Variable credit. May reenroll for a maximum of 6 credits. Approval of department.
Original civil engineering problem of specific interest to the student and a faculty member. Student's proposal describing problem required prior to approval.
- 802. Structural Dynamics I**
Fall. 3(3-0) C E 405, C E 406, or approval of department.
Basic concepts in structural dynamics; dynamic loading on structures due to blasts and earthquakes; dynamic properties of structures; methods of analysis; design approach to blast and earthquake resistant structures; dynamic behavior of bridges and other topics.
- 804. Advanced Structural Theory I**
Winter. 4(4-0) C E 400, or approval of department.
Energy principles and their application in the analysis of elastic structures. Advanced force and displacement methods and their matrix formulation. Introduction to finite element methods.
- 805. Advanced Theory of Reinforced Concrete I**
Winter. 3(3-0) C E 406.
Deflection, torsion, shrinkage, plastic flow, and ultimate strength of concrete structures. Prestressed concrete.
- 807. Model Analysis**
Fall. 3(2-3) C E 406.
Basic theory of the analysis of structures by means of models. Laboratory work on models; Begg's deformeter and electric resistance type gauges for the measurement of static and dynamic strains.
- 809. Finite Element Method**
Fall. 4(4-0) Approval of department. Interdepartmental with the departments of Metallurgy, Mechanics and Materials Science, and Agricultural Engineering. Administered by the Department of Metallurgy, Mechanics and Materials Science.
Theory and application of the finite element method to the solution of continuum type problems in heat transfer, fluid mechanics and stress analysis.
- 815. Principles of Highway and Airport Soils**
Fall. 4(4-0) C E 347.
Foundation problems as related to highways and airports, relation of subsoil conditions to design and construction, analytical review of laboratory and field results.
- 817. Mechanical Properties of Soils**
Fall. 4(3-3) C E 419 or approval of department.
Mechanical properties of soil including stress-strain behavior; conditions of failure and shear strength; consolidation theory and permeability. Laboratory determination of soil properties including interpretation of experimental data for use in practice.
- 818. Advanced Soil Mechanics**
Winter. 4(4-0) C E 419; C E 817 recommended.
Foundations and earth retaining structures; bearing capacity, lateral resistance and settlement of deep foundations; earth pressures on braced excavations and sheet pile walls; design of caissons and cofferdams.
- 819. Soil Stabilization in Geotechnical Engineering**
Summer. 3(3-0) C E 419.
Techniques to improve the performance of soil in engineering applications; compactions, blending, admixture, grouting, electroosmosis, vibroflotation, compaction piles, thermal treatment, load bearing and hydraulic fills, precompression, reinforced earth.
- 820. Geotechnical Engineering for Cold Regions**
Spring. 3(3-0) C E 419 or approval of department.
Physical and thermal properties of ice and frozen soils; ground thermal regime; mechanical properties of frozen ground; thaw consolidation problems; foundation design; slope stability problems; and artificial freezing for construction.
- 821. Flow of Fluids in Porous Media**
Fall. 4(4-0) C E 422 or approval of department.
Structure and properties of porous media. Fluid flow in saturated and unsaturated media. Two-phase flow. Darcy's and Navier Stokes equations. Two-dimensional sink flow. Multiple sources and sinks. Potential theory and conformal mapping. Permeability in an anisotropic medium.
- 827. Environmental Fluid Mechanics**
Spring of even-numbered years. 4(4-0) C E 422 or approval of department.
Review of turbulent flow and transport processes in water quality control. Analysis and solution of ecological problems related to diffusion and disposal in rivers, estuaries, lakes and the ocean environment.

Descriptions - CIVIL AND SANITARY ENGINEERING

of

Courses

828. Open Channel Flow

Winter. 3(3-0) C E 422 or approval of department.

Fundamentals of free surface flow; steady uniform and nonuniform concepts; energy and momentum principles; subcritical and supercritical regimes; gradually and rapidly varied flow; design applications.

829. Fluid Transients

Spring of odd-numbered years. 4(4-0) C E 828 or approval of department.

Application of unsteady flow concepts and wave mechanics to hydraulic engineering; method of characteristics; surges and waterhammer in piping systems; unsteady open channel flow; oscillatory waves; similitude and models. For students interested in fluid mechanics.

840. Pavement Design

Spring of even-numbered years. 3(3-0) C E 449.

Pavement types and wheel loads, stresses in flexible pavements, stresses in rigid pavements, pavement behaviors under loadings; climate effects on pavement performance, evaluating subsoil strengths, subgrades, and pavement design criteria.

841. Optimization of Urban Traffic Flow

Fall of odd-numbered years. 3(3-0) Approval of department. Interdepartmental with and administered by Systems Science.

Traffic flow models used in design of computerized traffic control systems. Optimal freeway ramp metering algorithms. Offline and online optimization of traffic signal timing.

842. Pavement Rehabilitation

Spring of odd-numbered years. 4(4-0) C E 449.

Strengthening existing pavements, pavement overlay design criteria, epoxy and polyester resin repair and rehabilitation, evaluation of resurfacing practices for bituminous and cement pavements.

843. Traffic Engineering Characteristics

Winter of odd-numbered years. 3(3-0) C E 346, STT 421.

Safety analyses, flow and capacity characteristics, statistical properties of traffic, queuing characteristics at intersections, delay characteristics and analyses.

844. Traffic Engineering Theory and Control

Spring of odd-numbered years. 3(3-0) C E 843.

Application of the theory of traffic flow to the design and control of traffic streams. Dispatching, scheduling and network analysis. Application to highways, airport operation and urban transportation modes.

845. Environmental Impacts of Transportation Facility Design Decisions

Spring of even-numbered years. 3(3-0) C E 342 or C E 346, C E 448; or approval of department.

The context in which current transportation planning and design decisions are made; legislation; socio-economic effects; air, noise, and water pollution. Preparation of environmental impact statements.

846. Highway Planning

Fall of odd-numbered years. 3(3-0) C E 346 or approval of department.

Highway inventory, road use studies and programming, analysis of highway costs, economic considerations in location and design.

847. Geometric Design of Highways

Winter of even-numbered years. 3(3-0) C E 347.

Design of streets and highways including intersections, parking facilities, capacity, channelization and roadway appurtenances.

848. Transportation Models

Spring of odd-numbered years. 3(3-0) C E 448.

Analysis of transportation modeling process, including error propagation and parameter sensitivity analysis. Comparative attributes of zonal size and model sequence decisions on the evaluation of system alternatives.

880. Special Problems in Civil Engineering

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Research problems of limited scope not pertaining to thesis accomplished under C E 899 or C E 999.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

905. Advanced Theory and Design of Reinforced Concrete II

Spring. 3(3-0) C E 805.

Continuation of C E 805 with application of theory to analysis and design of tanks, rigid frames, and shells.

906. Advanced Structural Steel Design

Spring. 3(3-0) C E 406.

Analysis and design of multiple-story building frames, continuous trusses and rigid-frame girder bridges in structural steel. Plastic design.

909. Elastic Thin Shells

Spring. 4(4-0) C E 804 or MMM 815 or approval of department; MTH 421.

Interdepartmental with the Department of Metallurgy, Mechanics and Materials Science.

Elements of differential geometry, membrane theory of shells, Pucher's stress function, deformation and bending of shells of revolution and shallow shells.

912. Theory of Plates

Winter. 4(4-0) C E 804 or MMM 815 or approval of department; MTH 422.

Interdepartmental with and administered by the Department of Metallurgy, Mechanics and Materials Science.

Bending of thin elastic plates with various shapes and boundary conditions; application of energy principles and approximate methods of solution; thick plates, large deflection theory; sandwich plates.

915. Earth Structure

Spring. 3(3-0) C E 817 or approval of department.

Embankments, earth dams, natural and cut slopes, stability of circular and composite slip surfaces; performance of embankments on soft foundations; seepage through earth dams; instrumentation for field performance evaluation.

916. Soil Dynamics

Winter. 4(4-0) C E 817 or approval of department.

Characteristics of ground motions during earthquakes; dynamic soil properties; liquefaction and settlement under transient and repeated loadings; foundation design for vibratory loads; wave propagation in soil media.

941. Mass Transit Routing and Scheduling

Fall of even-numbered years. 3(3-0) C E 848 or approval of department.

Routing algorithms for mass transit vehicles in urban networks; dispatching of vehicles by dynamic programming and other algorithms; variable headway, variable route transit system studies.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Sanitary Engineering

SE

800. Environmental Engineering Seminar

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits. Graduate major in C E or S E.

Current research, reports, and literature reviews.

802. Physical Chemical Processes of Environmental Engineering

Fall. 5(4-3) C E 481, C E 483 or concurrently.

Analysis of physical and chemical principles which form the basis of air and water pollution control and solid waste disposal; process dynamics, sedimentation, coagulation, filtration, adsorption, absorption, oxidation.

804. Biological Processes of Environmental Engineering

Winter. 4(4-0) MPH 200, S E 802.

Aerobic and anaerobic degradation of liquid and solid wastes. Biochemical reactions; activated sludge and trickling filter kinetics; sludge digestion and composting.

812. Water Treatment Plant Design

Winter. 4(3-3) C E 370, C E 483, C E 828, S E 802.

Theory and design of water treatment processes. Coagulation and flocculation; softening; sedimentation; filtration; disinfection.

814. Wastewater Treatment Plant Design

Spring. 4(3-3) C E 370, C E 483, C E 828, S E 804.

Theory and design of wastewater treatment processes. Racks, screens, sedimentation basins, trickling filters, aeration tanks, digesters.

816. Treatment of Industrial Wastes

Spring. 4(3-3) S E 804.

Theory of industrial waste management. Application of physio-chemical and biological treatment to selected industries. Examples include: apparel; food processing; materials processing and chemical industry.

822. Air Resource Management
Fall of even-numbered years. 4(4-0) S E 802 or concurrently.
Characteristics of air contaminants and noise; sources and source inventory; microclimatology and pollutant transport; pollutant effects, introduction to sampling and control.

880. Special Problems in Environmental Engineering
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 12 credits in C E 880 and S E 880 combined. Approval of department.
Solution of environmental engineering problems, of limited scope not pertaining to thesis.

899. Master's Thesis Research
Fall, Winter, Spring, Summer.
Variable credit. Approval of department.

922. Air Pollution Control
Winter of odd-numbered years. 4(3-3) C E 321; S E 802, S E 822.
Application of physical and chemical principles to control of gaseous and particulate air pollutants. Cyclones, bag houses, electrostatic precipitators, adsorption, absorption, combustion.

924. Air Sampling and Analysis
Spring of odd-numbered years. 4(3-3) S E 922.
Theory and design of air sampling programs. Quantitative analysis of ambient air samples and stack samples. Analysis for sulfur oxides, nitrogen oxides and particulates.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer.
Variable credit. Approval of department.

CLASSICAL STUDIES

See Romance and Classical Languages.

COMMUNICATION COM

College of Communication Arts and Sciences

100. Human Communication I
Fall, Winter, Spring, Summer. 3(3-0).
Process and functions of communication. Principles underlying communication behavior. Practice in analyzing communication situations and in speaking and writing.

101. Human Communication II
Fall, Winter, Spring, Summer. 3(3-0) COM 100.
Continuation of COM 100, with greater emphasis on speaking and writing, and on analyzing increasingly complex communication situations.

115. Oral Communication
Fall, Winter, Spring, Summer. 3(3-0) COM 100 or approval of department.
Principles and practice in adapting to audiences, creating and structuring messages, and developing effective delivery of formal and informal speeches. Critical evaluation of speeches by instructor and peers.

199. Methods of Inquiry
Fall, Winter, Spring, Summer. 3(3-0) Majors and minors only. COM 101.
Major theoretic orientations toward communication. Primary tools of scholarly inquiry.

205. Persuasion
Fall, Winter, Spring, Summer. 4(4-0) COM 101.
Process of influencing human behavior through persuasive communication. Experience in creating persuasive messages and in evaluating the acceptability of persuasive attempts.

210. Leadership
Fall, Winter, Spring, Summer. 4(4-0) COM 100.
Principles and practice in the utilization of communication for effective leadership.

299. Individual Projects
Fall, Winter, Spring, Summer.
Variable credit. May reenroll for a maximum of 15 credits. COM 199, approval of project proposal by department.
Independent research, experience in communication laboratories, or tutorial work in communication skills.

300. The Effects of Mass Communication I
Fall, Winter, Spring, Summer. 4(3-0) Majors must enroll in COM 300R concurrently.
Major social effects of mass media on audience behavior. Political communication. Media effects on children. Message strategies producing attitude change. Interrelationship between mass media and interpersonal communication. Decision making in mass media.

300R. Effects of Communication II
Fall, Winter, Spring, Summer. 1 credit.
Majors. COM 300 concurrently.
In-depth consideration of effects of communication.

315. Organizational Communication
Fall, Winter, Spring. 4(4-0) COM 101.
Principles and practice in the management of communication systems, with emphases on conflict resolution, information exchange, innovativeness, and information management.

326. Communication in Business
(BIO 326.) Fall, Winter, Spring, Summer. 4(4-0) Juniors.
Study and analysis of business and industrial communication problems; extensive instruction and practice in writing.

350. Signs and Sign-Behavior I
Fall, Winter, Spring, Summer. 4(4-0) COM 100; majors must enroll in COM 350R concurrently.
Theories of man's symbolic behaviors. Semiotics and general semantics.

350R. Signs and Sign-Behavior II
Fall, Winter, Spring, Summer. 1 credit.
Majors. COM 350 concurrently.
In-depth consideration of signs and sign behavior.

351. Message Analysis
Winter. 4(4-0) COM 350.
Methods of describing messages and message codes, with emphasis on the concept of information.

352. Non-Verbal Communication
Spring. 4(4-0) COM 350.
Continuation of COM 351, with emphasis on non-verbal codes: gesture, expression, time and space, light.

360. Critical Perspectives on Communication
Fall, Winter, Spring. 4(3-0) COM 100.
Interdependence of communication and other societal factors, emphasizing criteria for ethical and social appropriateness.

399. Special Topics in Communication
Fall, Winter, Spring, Summer. 4(4-0) May reenroll for a maximum of 8 credits. Juniors.
Contemporary issues in communication.

405. Quantitative Strategies in Communication Research
Fall, Spring. 5(5-0) Seniors.
Design and statistical strategies in communication research. Project design and evaluation schema. Basic data handling and presentation.

410. Classroom Communication
Spring. 3(3-0) Majors and minors or approval of department.
Classroom as a communication system with emphasis on operationalizing philosophies of education in the environment, teacher and student roles and styles, affective and cognitive interactions, methods of systematic observation.

411. Directing the Debate and Forensic Program
Fall. 3(3-0) Majors and minors or approval of department.
Principles of and practice in argumentation; methods of coaching debate and individual events and managing tournaments; observation of high school tournaments, practices, and student congress.

413. Seminar in Communication Education
Winter, Summer. 4(4-0) ED 327.
Philosophies of curricular and co-curricular programs in communication education. Internship experience in those programs.

420. Message Design
Winter. 4(4-0) COM 101.
Principles and practice in message-media construction and selection.

499. Special Projects
Fall, Winter, Spring, Summer.
Variable credit. May reenroll for a maximum of 15 credits. Approval of project proposal by department.
Independent research, group research, student-directed group projects.

805. Communication Research
Fall. 5(4-2) Majors.
Communication research strategy and methodology. Scientific process, bases for derivation and verification of hypotheses, and basic methods of designing research in communication.

806. Communication Research
Winter. 4(5-0) COM 805.
Continuation of COM 805.
