

**901. Problems in Cultural Geography**  
Fall, Winter, Spring. Variable credit.  
May reenroll for a maximum of 6 credits.  
Approval of department.  
Special research problems.

**902. Problems in Physical Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 6 credits.  
Supervised research in specific topics of physical geography.

**906. Problems in Economic Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 6 credits. Approval of department.  
Special research problems.

**908. Problems in Political Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 6 credits. Approval of department, GEO 416.  
Special research problems.

**910. Problems in Historical Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 6 credits. Approval of department.  
Special research problems in historical geography.

**912. Independent Study in Regional Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 15 credits. Approval of department.  
Individual studies in regional geography.

**918. Problems in Geography**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 9 credits. Approval of department.  
Research on specific geographical problems.

**934. Problems in Population**  
Fall, Winter, Spring, Summer.  
Variable credit. May reenroll for a maximum of 9 credits. Approval of department.  
Special research problems.

**970. Problems in Medical Geography**  
Fall, Winter, Spring. Variable credit.  
May reenroll for a maximum of 6 credits.  
Approval of department.  
Selected research topics in medical geography.

**999. Doctoral Dissertation Research**  
Fall, Winter, Spring, Summer.  
Variable credit. Approval of department.

## GEOLOGY

## GLG

## College of Natural Science

**200. The Geology of Man's Environment**  
Fall, Winter, Spring, Summer. 3(3-0)  
Not open to Geology majors. Credit will be given in only one of the following: GLG 200, GLG 201, GLG 306.

Man and his geologic environment: earthquakes, volcanoes, landslides, subsidence, flooding, coastal erosion, hydrology and human use, waste disposal, geologic aspects of environmental health, resources and energy, environmental law.

**200L. Laboratory—Geology of Man's Environment**  
Fall, Winter, Spring, Summer. 1(0-3)  
GLG 200 or concurrently.

Laboratory study of geologic processes associated with environmental hazards. Emphasis placed on land-use planning, applying geologic criteria to evaluate land potentials.

**201. Earth Processes**  
Fall, Winter, Spring, 4(4-2) Credit will be given for only one of the following: GLG 200, GLG 201, GLG 306.

Physical processes concerning evolution of Earth and its environments. Conservation and interaction of energy and matter through time. Laboratory stresses interpretation of process through studies of geologic data.

**202. Evolution of the Earth**  
Fall, Winter, Spring, 4(4-2) GLG 200; or GLG 201; or GLG 306.

Integration of physical, chemical and biological processes from which man's present environment has evolved; problems and controversies in the development of ideas of geologic and organic evolution.

**205. Oceanology—The Marine Environment and Man**  
Fall. 3(3-0)

Physical oceanography, including origin, hydrologic, chemical, geological properties; and environmental quality of the oceans. Man-sea interactions are emphasized including resource utilization and pollution.

**221. Minerals, Rocks and Fossils**  
Spring 3(2-3) Not open to majors.

Description, occurrence and identification of minerals, rocks, fossils, and additional features of especial significance to general science teachers and other earth science interest groups.

**282. Energy Resources of the Earth**  
Winter. 3(3-0)

World energy resources of petroleum, coal, and atomic fuel. Social, political, economic and environmental problems of fuels.

**300. Solar System Geology**  
Winter. 4(4-0) AST 119 or AST 217 or AST 229; GLG 200 or GLG 201.

The origin, relationships, make-up and features of the bodies in the solar system emphasizing recent space exploration results and developing theories.

**302. Vertebrate Life of the Past**  
Fall. 3(3-0) One course in a physical or biological science or Juniors. Interdepartmental with the Department of Zoology.  
Fossil vertebrates from fish to man.

**304. Geology of Michigan**  
Fall. 3(3-0) GLG 200 or GLG 201 and/or GLG 202; or approval of department.

A historical accounting of the physical, historical and economic geology of Michigan and its environs; a course designed for students seeking an overall picture of the rather unique Michigan geological environment.

**306. Engineering Geology**  
Fall, Spring. 3(3-2) Credit will be given for only one of the following: GLG 200, GLG 201, GLG 306. Sophomore Engineering students.

Fundamental principles of geology as applied to civil engineering practice. Minerals and rocks, aerial photographs, topographic and areal geologic maps and geologic cross sections studied in laboratory. Source of geologic literature and maps.

**307. Geology Central Appalachians**  
Fall, Spring. 1(0-2) GLG 200, or GLG 201, or GLG 202, or concurrently.

General geology of the Central Appalachians. A preparatory course for GLG 308. Field excursions—Central Appalachians during spring vacation.

**308. Field Excursion—Central Appalachians**  
Spring. 2 or 3 credits. GLG 307.

Training in stratigraphic, sedimentological, paleontologic, and structural principles as applied to field methods.

**321. Mineralogy**  
Fall. 5(4-4) One term of chemistry.

Introduction to crystal systems and forms exhibited by minerals, followed by study of composition, occurrence, classification, and identification of nonmetallic minerals.

**322. Mineralogy**  
Winter. 4(3-4) GLG 321.

Economic and chemical importance of minerals; mineralogy of non-silicates; practical crystallography; geochemistry of minerals.

**335. Fossil Plants, Their History and Paleocology**  
Spring. 3(3-0) One course in geology or botany or biology or approval of department.

Interdepartmental with the Department of Botany and Plant Pathology.

History of plants through geologic time; their form and evolution; how and where found, identified and reconstructed; their use in determining ancient geographic patterns, paleoenvironments, paleoclimates and community structure. Field trip.

**337. The Fossil Record of Organic Evolution**  
Spring. 3(3-0) One course in a natural science; Juniors. Interdepartmental with the Department of Zoology.

The direct evidence for organic evolution in the fossil record. Evolution of life from prebiological systems to man. Impact of fossil discoveries on human thought.

**344. Field Geology—Summer Camp**  
Summer. 9 credits. GLG 202, GLG 363.

Trigonometry; GLG 446, GLG 437, GLG 451 recommended.

Methods and techniques of geological surveying and mapping. Field interpretation of geological phenomena in igneous, metamorphic and sedimentary rocks in northern Michigan and Wisconsin.

## Descriptions - GEOLOGY

of

### Courses

- A. Introduction to Field Techniques**  
3 credits.  
Introduction to field techniques with stress in those that apply to sedimentary rocks. Stratigraphic correlation.
- B. Methods of Geological Mapping**  
4 credits.  
Plane table surveys, aerial photo and reconnaissance mapping. Examination and interpretation of structural and textural relationships in igneous and metamorphic rocks.
- C. Geologic Interpretation of Selected Areas**  
2 credits.  
Independent mapping and interpretation.
- 363. Lithology**  
Winter. 4(3-4) GLG 321.  
Processes that form igneous, metamorphic and igneous rocks, origin, distribution, variation and occurrence of rock. Study of rock properties in the field, in laboratory, and with the microscope.
- 392. Sedimentology**  
(492.) Spring. 3(2-3) GLG 363.  
Grain and aggregate properties of sediments; relationships of these properties to processes in the environment of deposition and to the predepositional and post-depositional history.
- 400H. Honors Work**  
Fall, Winter, Spring. Variable credit.  
Approval of department.
- 403. Fluvial Geomorphology**  
Fall. 4(3-4) Junior majors in GLG, C E, and CSS; one course in physical geology and junior standing in geology, civil engineering or soil science.  
Quantitative analyses of the fluvial processes associated with the development of drainage basin morphology, with emphasis on stream bed erosion and sediment transport. Field trips are required.
- 411. Hydrogeology**  
Winter. 3(3-2) One term of geology and trigonometry.  
Principles of the sources, occurrence, and movement of ground water. Surface and subsurface investigations of ground water and elementary ground water hydrology.
- 413. Glacial Geology**  
Spring. 4(3-4) GLG 201.  
Geological aspects of glaciers and glaciation. Theories of ice ages through geologic time. Origin and development of glacial geomorphic features. Character and chronology of the Pleistocene. Laboratory techniques, with field trips to observe glacial materials and features of Michigan.
- 426. Optical and X-ray Mineralogy**  
Fall. 4(3-4) GLG 321, PHY 239 or PHY 289.  
Theory, principle and application of the polarizing microscope and X-ray diffractometer in mineral analysis.
- 430. Vertebrate Paleontology**  
Winter. 4(3-3) ZOL 428 or approval of department. Interdepartmental with the Department of Zoology.  
Fossil vertebrates with emphasis on the evolution of major groups. Laboratories on modern techniques and on the identification and interpretation of fossils.
- IDC. Introduction to Meteorology**  
For course description, see Interdisciplinary Courses.
- IDC. Introductory Meteorology Laboratory**  
For course description, see Interdisciplinary Courses.
- 437. Invertebrate Paleontology**  
Fall. 4(3-4) GLG 202 or ZOL 303 or approval of department. Interdepartmental with the Department of Zoology.  
Systematics and evolution of marine invertebrates; uses of fossils in correlation and delineation of geologic time; structure and morphology of fossils as related to evolutionary development.
- 438. Paleocology**  
Spring. 4(3-4) GLG 202 or ZOL 389 or approval of department. Interdepartmental with the Department of Zoology.  
Distribution and abundance of marine fossils; response of skeletal morphology to environmental conditions; uses of fossils in reconstructing ancient climates and depositional environments.
- 445. Field Studies**  
Fall, Winter, Spring, Summer. Variable credit. May reenroll for a maximum of 12 credits. Approval of department.  
Advanced geologic or geophysical field studies.
- 446. Principles of Stratigraphy**  
Fall. 3(3-0) GLG 437, GLG 392 or approval of department.  
Covers principles of stratigraphy and application and exemplification of these principles to known geologic occurrences.
- 451. Structural Geology**  
Spring. 4(2-6) GLG 202.  
Description, classification, and origin of secondary structures such as folds, faults, joints, cleavages, foliations and lineations. Three-dimensional visualization stressed in economic laboratory problems involving descriptive geometry, stereographic projections, areal, and structural geologic maps.
- 462. Petrology**  
Winter. 4(3-4) GLG 363, GLG 426.  
Introduction to the chemical and physical processes that are responsible for the origin and evolution of igneous and metamorphic rocks. Laboratory studies of rock suites that illustrate basic processes in petrology.
- 473. Quantitative Methods in the Geological Sciences**  
Spring. 3(3-0) MTH 113, GLG 201.  
Solution of various geophysical and geological problems by theoretical methods. Topics selected from seismology, geochronology, gravity, petrology, and geofluid dynamics.
- 474. Exploration Geophysics**  
Fall. 4(3-2) GLG 201 or GLG 306; MTH 113; PHY 239 or PHY 289; GLG 473 recommended.  
Techniques used in geophysical exploration, with application in petroleum prospecting, minerals exploration, and engineering. Includes gravity, magnetic, seismic, electrical and other methods, and well logging. Interpretation of geophysical data.
- 475. Solid Earth Geophysics**  
Winter. 3(3-0) GLG 201 or GLG 306; GLG 473 or MTH 214; PHY 239 or PHY 289.  
Geophysics, including Earth's composition and structure, its dynamic character, radioactivity and age determinations, seismicity and seismology, gravity and magnetic fields, heat flow, physical properties of earth materials.
- 479. Geophysics of the Lithosphere I**  
Spring. 3(3-0) GLG 474 or GLG 475; MTH 214 recommended.  
Tectonics of crustal plates emphasizing sea-floor spreading and continental drift. Tectonics of plate margins, plate kinematics, observational seismology, inter- and intra-plate stresses, and paleo-continental reconstructions.
- 482A. Mineral Resources**  
(482.) Spring of odd-numbered years. 4(4-0) GLG 321, GLG 451.  
Genesis, distribution, and classification of ore deposits. Emphasis on metallic ores. Global patterns and tectonic relationships.
- 482B. Mineral Resources Evaluation**  
Spring of even-numbered years. 3(3-0) GLG 321, GLG 451 and approval of department.  
Emphasis on practical applications of geoscience to mineral resources and the extractive industries. Aspects of exploration and development of reserves including evaluation, grade estimation, drilling, recovery, and beneficiation.
- 483. Petroleum Geology**  
Fall. 4(3-2) Approval of department.  
Fundamental principles of the origin, migration and accumulation of petroleum. Exploration techniques to include well drilling, electric and radioactivity well logging, surface and subsurface exploration methods, seismic surveys, land leasing and oil field development. Laboratory study of well log plotting and subsurface mapping technique.
- 484. Applied Petroleum Geology**  
Winter. 4(1-6) GLG 483.  
Microscopic examination of well cuttings, practice in the use of electric and radioactivity logs, exploration for petroleum in selected areas by subsurface mapping techniques, economics of petroleum exploration. Field trips.
- 493. Carbonate Sedimentology**  
Winter. 3(2-3) GLG 392.  
Genesis of carbonate sediments including discussion of carbonate-secreting organisms, effects of environment on mineralogy, depositional environments and diagenesis.
- 495. Geochemistry**  
Fall. 3(3-0) GLG 201, CEM 152 or approval of department.  
Origin of the elements. Geochemical evolution of universe, solar system, earth. Factors affecting the distribution of elements in earth including the applications of thermodynamics and crystal field theory. Isotope geology.
- 496. Geochemical Cycles**  
Spring of odd-numbered years. 3(3-0). GLG 495 or approval of department.  
Examination of the natural circulation of the elements; human impact on these cycles; and the effect of trace elements on health and disease.

**800. Special Problems**

Fall, Winter, Spring, Summer.  
Variable credit. Approval of department.  
Special problems in hydrogeology, geomorphology and glacial geology, mineralogy and crystallography, petrology, paleontology, structural geology, and petrofabrics, stratigraphy, aerogeology, geophysics, economic geology, petroleum geology, sedimentation, and geochemistry.

**803. World Regional Geology**

Spring of even-numbered years. 3(3-0)  
One course each in structural geology, sedimentation.  
World regional geology emphasizing mountain building, basin structure and associated sediments, continental drift and plate tectonics.

**810. Seminar**

Fall, Winter, Spring. 1 to 3 credits.  
May reenroll for a maximum of 12 credits.  
Seminar relating to current research in geology.

**825. Clay Mineralogy**

Winter. 4(3-4) CSS 840, CSS 850 or approval of department. Interdepartmental with the Department of Crop and Soil Sciences.  
Structures and properties of clays; their origins, occurrence, and utilization. Methods of studying clays including x-ray diffraction, differential thermal analysis, infrared absorption and other chemical and physical techniques.

**830. Paleobotany**

Fall. 4(3-4) Approval of department. Interdepartmental with and administered by the Department of Botany and Plant Pathology.  
Survey of fossil plants: their preservation, occurrence, geology, paleogeography, paleoecology, evolutionary history, classification and representative types. One weekend field trip to fossil plant locality.

**831. Palynology**

Spring of even-numbered years. 4(3-4)  
Approval of department. Interdepartmental with the Department of Botany and Plant Pathology.  
An introduction to the principles and techniques of spore and pollen analysis, both fossil and recent, and utilization of plant micro-fossils for stratigraphic determinations and paleoecologic interpretations of most sedimentary accumulations and rocks. Includes certain algae, protozoans, similar organisms of uncertain affinity and dissociated fragments of larger organisms.

**833. Advanced Invertebrate Paleontology**

**B. Quantitative Paleontology**  
Fall. 3(2-4) GLG 437 or GLG 438.  
Interdepartmental with the Department of Zoology.  
Application of mathematical tools to paleontological problems, including statistical applications and numerical taxonomy; computer applications.

**C. Paleocology**

Fall. 3(2-4) GLG 437 or GLG 438.  
Interdepartmental with the Department of Zoology.  
Advanced problems in population, community, and province level paleocology, primarily of marine invertebrates, including study of taxonomy, diversity, and adaptation.

**D. Developmental Paleontology**

Fall. 3(2-4) GLG 437 or GLG 438, ZOL 317 or approval of department.  
Interdepartmental with the Department of Zoology.  
Application of the principles of development to the ontogeny and phylogeny of fossil invertebrates as known from skeletal morphology.

**E. Evolutionary Paleontology**

Fall. 3(2-4) GLG 437 or GLG 438.  
Interdepartmental with the Department of Zoology.  
Aspects of evolutionary biology that can be studied in the fossil record, with emphasis on marine invertebrates.

**834. Advanced Vertebrate Paleontology**

Winter of even-numbered years. 3(3-0)  
GLG 430 or approval of department.  
Interdepartmental with the Department of Zoology.  
Recent advances and controversial issues in vertebrate paleontology including origin, classification, phylogeny, and stratigraphic relationships of fossil vertebrates.

**838. Advanced Paleobotany**

Winter. 3(2-4) Approval of department. Interdepartmental with and administered by the Department of Botany and Plant Pathology.  
Morphology, anatomy, phylogenetic relationship and classification of fossil plants. Microscopic analysis of tissues and organs prepared by thin section, transfers, peels, polished and etched surfaces, and macerations.

**843. Paleozoic Stratigraphy**

Winter of even-numbered years. 4(5-0)  
GLG 446, GLG 392.  
Classification, distribution, paleogeography, paleontology, interrelation, and structural setting of stratigraphic units within the Paleozoic systems. Laboratory work involves construction of correlation charts, structure and restored sections, paleogeologic, paleogeographic, and lithofacies maps, and study of certain key fossils.

**844. Mesozoic and Cenozoic Stratigraphy**

Winter of odd-numbered years. 3(3-0)  
GLG 446.  
Stratigraphy and paleontology with emphasis on tectonics and sedimentation.

**852. Structure of Ore Bodies**

Winter of even-numbered years. 3(2-4)  
GLG 451, MTH 214.  
Mathematics and physics applied to problems in structural geology.

**861. Evolution of the Earth's Crust and Mantle**

Fall. 3(3-0) GLG 462.  
The composition, mineralogy and petrology of the Earth's mantle and crust. Plate tectonics and its relationship to earlier models of geosynclines, orogenic cycles, continental drift, etc.

**862. Petrology—Igneous**

Spring of even-numbered years. 2 to 4 credits. May reenroll for a maximum of 8 credits. GLG 462. Must enroll for laboratory with initial registration.  
Physical and chemical principles involved in the origin of igneous rocks. Application of experimental techniques in petrology.

**863. Petrology—Metamorphic**

Spring of odd-numbered years. 2 to 4 credits. May reenroll for a maximum of 8 credits. GLG 462. Must enroll for laboratory with initial registration.  
Origin and classification of metamorphic rocks. Study includes thin section investigation of the metamorphic textures and mineral associations and the physical-chemical principles involved in their development.

**870. Topics in Geophysics**

Spring. 1 to 3 credits. May reenroll for a maximum of 12 credits. Approval of department.  
Topics and problems in geophysics, such as tectonophysics, terrestrial heat flow, processing and analysis of geophysical data, geomagnetism, paleomagnetism, high-pressure geophysics.

**872. Exploratory Seismology**

Fall of even-numbered years. 4(2-4)  
GLG 474.  
Theory and technique of field seismic exploration methods. An associated geophysical survey will be conducted and a report prepared.

**873. Seismology I**

Winter of odd-numbered years. 3(3-0)  
MTH 215 or concurrently; PHY 289 or concurrently.  
Theory and application of seismic wave propagation in earth materials.

**874. Seismology II**

Spring of odd-numbered years. 3(3-0)  
GLG 873 or approval of department.  
Continuation of GLG 873.

**875. Advanced Geophysical Exploration I**

Winter of even-numbered years. 4(3-2)  
GLG 474.  
Theory and technique of gravity and magnetic methods, and their use in geophysical exploration. Associated practical exercises.

**876. Advanced Geophysical Exploration II**

Spring of even-numbered years. 4(3-2)  
GLG 474, MTH 214.  
Methods and techniques in geophysical exploration, including electrical, electromagnetic, radioactivity, magnetotelluric, and the physical principles of well logging. Associated practical exercises.

**877. Geophysics of the Lithosphere II**

Fall of even-numbered years. 3(3-0)  
GLG 475, GLG 479.  
Structure and tectonic processes at convergent and divergent plate margins. Earthquake location and prediction, thermal modelling of slabs, origin of back-arc basins, and inter- and intra-plate stresses. Regional tectonic analyses.

**878. Dynamic Processes in the Earth**

Fall of odd-numbered years. 3(3-0)  
GLG 451, GLG 475, MTH 310 or approval of department.  
Stress and strain analysis, rheology of materials, buckling and bending of strata, lithospheric stresses, geofluid dynamics, surface waves, attenuation, and other seismological topics.

**884. Regional Petroleum Geology**

Spring of odd-numbered years. 3(3-0)  
Approval of department.  
Regional study of tectonics, stratigraphy and sedimentation in the U.S. and their relationship to petroleum occurrences in sedimentary basins. Analysis of petroleum distribution with emphasis on creative thinking in petroleum exploration. Practice in the analysis of petroleum possibilities in selected foreign areas.

## Descriptions – GEOLOGY

of

### Courses

**891. Advanced Sedimentology**  
(891B.) Spring, 3(2-4) GLG 392.  
Origin, deposition and diagenesis of sandstones. Study includes thin section, X-ray, and SEM analysis of sediments.

**894. Aqueous Geochemistry**  
Spring of odd-numbered years. 3(3-0)  
GLG 495 or a course in physical chemistry or approval of department.  
Nature and regulation of electrolytes in solution (fresh water, seawater, brine); activity, complexation, and redox effects. Trace metals in solution. Carbonate, silica, alumina systems. Chemical weathering and mobility of elements.

**895. Topics in Geochemistry**  
C. Analytical Geochemistry  
Fall of even-numbered years. 1 to 3 credits. May reenroll for a maximum of 12 credits. GLG 462, GLG 495.  
Instrumental techniques for the analysis of geological materials. Topics on application of X-ray diffraction, X-ray fluorescence, neutron activation analysis, and atomic absorption spectrometry. Recently developed techniques in geochemistry will be discussed.

**896. Exploration Geochemistry**  
Spring of even-numbered years. 3(3-0)  
GLG 495 or GLG 894.  
Application of principles of geochemistry in the search for ore deposits and hydrocarbon accumulations.

**899. Master's Thesis Research**  
Fall, Winter, Spring, Summer.  
Variable credit. Approval of department.

**900. Special Problems**  
Fall, Winter, Spring, Summer.  
Variable credit. Approval of department.  
Special problems in hydrogeology, geomorphology and glacial geology, mineralogy and crystallography, petrology, paleontology, structural geology and petrofabrics, stratigraphy, acrogeology, geophysics, economic geology, petroleum geology, sedimentation, and geochemistry.

**999. Doctoral Dissertation Research**  
Fall, Winter, Spring, Summer.  
Variable credit. Approval of department.

### Earth Science E S

**445. Field Studies**  
Fall, Winter, Spring, Summer. 1 to 9 credits. May reenroll for a maximum of 15 credits. Approval of department.  
Experience and techniques in field investigation of the near surface layers of the earth.

**446. Laboratory Investigations**  
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 15 credits. E S 445 or concurrently.  
Independent laboratory investigation of materials and phenomena obtained from field studies.

**800. Problems in Earth Science**  
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department.  
Independent study in topics related to earth science education.

## GERMAN AND RUSSIAN

### College of Arts and Letters

Students who have had high school work in the foreign language in which they wish to continue their studies must take a placement examination in that language. Placement in the appropriate course is determined by the results of this examination. University credit is not given for courses waived by performance on the placement examination.

### German and Russian Courses G R

**303. Folklore**  
Spring, 3(3-0)  
Folk heritage of peoples as revealed in their legends, superstitions, ballads, folksongs, hero tales, sayings, customs, and beliefs. Historical development of traditional lore as a reflection of social attitudes and the source for national mythologies.

**418. Scandinavian Contributions to Literary Tradition**  
Winter, 3(3-0) Approval of department.  
Interdepartmental with the departments of English and Romance and Classical Languages.  
Development and influence of the ideas, forms and motifs of the Scandinavian literatures in the literatures of the world.

**498. Topics in Comparative Literature**  
Fall, Winter, Spring, 3(3-0) or 4(4-0)  
May reenroll for a maximum of 12 credits if different topics are offered. Interdepartmental with the departments of English, and Romance and Classical Languages. Administered by the Department of Romance and Classical Languages.  
Varying topics on relationships among writers, themes, genres, movements and periods in different national literatures, and between literature and other arts.

**825. Comparative Literature: Studies in Theme and Idea**  
Fall, 3(3-0) May reenroll for a maximum of 9 credits. Interdepartmental with the departments of Romance and Classical Languages, and English. Administered by the Department of Romance and Classical Languages.  
Myths, archetypes, "Topoi," significant ideas and intellectual currents in different periods and cultural traditions.

**856. Comparative Literature: Literature and Other Disciplines**  
Winter, 3(3-0) May reenroll for a maximum of 9 credits. Interdepartmental with the departments of Romance and Classical Languages, and English. Administered by the Department of Romance and Classical Languages.  
Relations between literature and the sciences and other arts; social, historical, psychological, philosophical bases of literary study.

**878. Comparative Literature: Methods in the Study of Comparative Literature**  
Fall, 3(3-0) Interdepartmental with the departments of English, and Romance and Classical Languages. Administered by the Department of English.  
Rationale and techniques of study in comparative literature.

**902. Comparative Literature: Studies in Form and Genre**  
Winter, Spring, 3(3-0)  
Interdepartmental with the departments of English, and Romance and Classical Languages. Administered by the Department of English.  
Development and interrelationships of individual and collective forms and genres of literatures of the Western world, including the drama, tragedy, the novel, the short story, the theory and forms of poetry, popular literature, and the tale.

**903. Comparative Literature: Studies in Periodization**  
Fall, Winter, Spring, 3(3-0)  
Interdepartmental with the departments of English, and Romance and Classical Languages. Administered by the Department of English.  
Analyses of the manner in which various genres, conventions and continuing traditions of literature interact with the creative and critical climates of particular periods and movements, such as classicism, the Middle Ages, the baroque, or romanticism, in qualifying or modifying characteristic literary works.

**987. Seminar: Special Topics in Comparative Literature**  
Spring, 3(3-0) Advanced graduates.  
Interdepartmental with the departments of Romance and Classical Languages, and English. Administered by the Department of Romance and Classical Languages.

### German GRM

**101. Elementary German**  
Fall, Winter, Spring, Summer. 4(4-1)  
German language, civilization, and culture. Development of language skills in contemporary German. Independent practice in the language laboratory.

**102. Elementary German**  
Fall, Winter, Spring, Summer. 4(4-1)  
GRM 101.  
Continuation of GRM 101.

**103. Elementary German**  
Fall, Winter, Spring, Summer. 4(4-1)  
GRM 102.  
Continuation of GRM 102.

**105. Intensive Elementary German**  
Winter, Spring. 8(8-2) GRM 101 with 3.0 or better or approval of department. May not receive credit for both GRM 105 and GRM 102, GRM 103.  
Combination of GRM 102, GRM 103 in one term.

**111. German for Travelers**  
Spring. 2(3-0) Not applicable to major or minor requirements.  
Essential German for travelers: basic grammar, vocabulary and useful phrases. Introduction to German culture and life through lectures, audio-visual aids and reading.

**201. Intermediate German**  
Fall, Winter, Spring, Summer. 4(3-1)  
GRM 103.  
Systematic review of grammar, oral practice, intensive and extensive reading of modern texts. This course or equivalent is required of majors and those planning to take advanced work in German.
