

Descriptions – Food Science and Human Nutrition

of Courses

800. Seminar in Foods and Nutrition
Fall, Winter, Spring, 1(1-0) HNF 403 or HNF 463.

802. Seminar in Food Service Management
Spring, 2 to 4 credits. May reenroll for a maximum of 4 credits. Approval of department.

803. Problems in Food Service Management
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

805. Experimental Foods III
Spring, 4(1-9) HNF 404 or approval of department.
Planning, executing, and reporting individual research project. Data collection, evaluation and interpretation to demonstrate understanding of research techniques and attitudes, and an awareness of significant problems in the field.

813A. Special Studies in Nutrition
Fall, Winter, Spring, Summer. Variable credit. HNF 461.

813B. Special Studies in Experimental Foods
Fall, Winter, Spring, Summer of odd-numbered years. Variable credit. HNF 404; BCH 200 or BCH 451 and BCH 804.

813C. Special Studies in Food Service Management
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
Special studies in facility management, manpower coordination and tools and methods of operational control.

816. Applied Human Nutrition
Spring, 3(3-0) HNF 462.

840. Topics in Nutrition
Fall, Winter, Spring, Summer, 2 to 3 credits. HNF 462, PSL 432, BCH 401.
Advanced studies in nutrition: assessment and surveillance, community, clinical, growth and development, behavior, infectious disease and environment, oral health, obesity, aging, diet.

841. Nutrition and Obesity
Winter of even-numbered years, 2(2-0)
One undergraduate course in nutrition, biochemistry or physiology.
Assessment, energy metabolism, and risk factors associated with obesity. Significance of nutrition and other factors for weight control and reduction.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

921. Pathology of Nutritional and Metabolic Diseases
Spring of odd-numbered years, 4(3-2)
Approval of department; PTH 404 or ANT 420. ANS 525, BCH 452, HNF 462 recommended. Interdepartmental with and administered by the Department of Large Animal Surgery and Medicine.
Development, physiopathology and morphologic pathology of nutritional and metabolic diseases including carbohydrate, protein, fatty acid, vitamin and mineral deficiencies, their experimental induction and their medical or economic significance.

926. Comparative Nutrition--Lipids and Carbohydrates
Winter of odd-numbered years, 4(4-0)
BCH 452 and a previous course on principles of nutrition. Interdepartmental with Animal Husbandry.

Regulatory aspects of carbohydrate and lipid metabolism as influenced by nutrition in mammals. Emphasis on normal and abnormal physiological states such as obesity, ketosis and diabetes.

927. Comparative Nutrition--Protein Metabolism and Developmental Biology
Winter of even-numbered years, 4(4-0)
BCH 452, PSL 802 or concurrently. Interdepartmental with Animal Husbandry.

Protein quality assessment, protein status, protein calorie malnutrition, amino acid metabolism, protein turnover, digestion and absorption, hormonal control of protein metabolism, developmental aspects of protein metabolism and growth.

928. Comparative Nutrition--Minerals
Spring of even-numbered years, 3 credits. BCH 452, PSL 802. Interdepartmental with and administered by Animal Husbandry.

Forms and location in body, metabolic roles, deficiency and toxicity signs, interrelationships, requirements and biological availability of sources.

929. Comparative Nutrition--Vitamins
Spring of odd-numbered years, 3(3-0)
BCH 452 and a previous course on principles of nutrition. Interdepartmental with and administered by Animal Husbandry.

Chemical and physical properties, standards of activity, occurrence, metabolic roles, antivitamins, deficiency and toxicity signs, requirements and factors affecting requirements.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FOOD SYSTEMS ECONOMICS AND MANAGEMENT

FORESTRY FOR College of Agriculture and Natural Resources

In 305, 306, 402 and 430, field trips are scheduled for several consecutive days away from the campus for integrated field experience, primarily in the second half of spring term of the junior year, so that these courses must be taken concurrently. This precludes enrollment in other courses during that term. The approximate cost of these field trips is \$200.

IDC. Introduction to Resource Ecology
For course description, see Interdisciplinary Courses.

202. Introduction to Forestry
Fall, Spring, 3(3-0)

Forestry in its broadest sense, including: historic development, forest growth, protection and management, products, national and world economy and policy. Emphasis on multiple use concepts. One-day field trip required.

204. Forest Vegetation
Fall, Spring, 5(3-4)

Nomenclature, classification, and identification of important trees, shrubs, and herbaceous plants of forest and field.

220. Plants and Their Environment
Winter, 3(3-0) Intedepartmental with Agriculture and Natural Resources.

Relationships between plants and fundamental climatic, edaphic, and biotic factors; structure and function of different ecosystems in relation to environmental factors.

301. Quantitative Methods for Natural Resources

Winter, 4(3-2) MTH 109 or MTH 111.
Collection and analysis of information pertaining to natural resources. Survey design, field procedures, equipment, and analytical techniques.

304. Forest Ecology
Fall, 4(3-3) FOR 204; BOT 205; CSS 210 or concurrently.

The forest is viewed as a biological community. Forest site relationships are quantified by examining the existing physical environment and relating it to the forest species occupying that community.

305. Silviculture
Spring, 4(3-3) FOR 204, FOR 304, FOR 402, FOR 424, FOR 425, FOR 429 concurrently.
Natural and artificial forest reproduction methods; intermediate stand treatments; non-timber aspects of silviculture; field studies of silvicultural methods. Extended field trips required.

306. Forest Fire Protection and Use
Winter of odd-numbered years, 3(2-3)
Juniors or approval of department.

Causes and effects of forest fires. Combustion, fire behavior and fire weather. Prevention and control planning and techniques. Fire in forest land management.

309. Wood Technology
Fall, 4(3-3)

Structure of wood. Mechanical and physical properties of wood. Wood anatomy and relation to growth.

310. Wood Structure and Properties
Spring, 3(2-2) Not open to Forestry majors.

Properties of wood important in its utilization, including anatomy, moisture relations, natural defects, strength, insect and fungus susceptibility. Composite wood products and wood fasteners.
Approved through Spring 1982.

402. Forest Inventory
Spring, 4(2-4) FOR 301, FOR 305, FOR 424, FOR 425, FOR 429 concurrently.

Field and office techniques of forest inventory, with primary emphasis on timber resources. Extended field trips required.

- 409. Forest Hydrology**
Winter. 3(3-0) FOR 424, Seniors; or approval of department.
Hydrologic cycle, with emphasis on soil, water and ground water regimes; instrumentation and measurement of the various components. Effects of forest management on watersheds and water yields.
- 410. Forest Tree Improvement**
Fall. 3(2-2)
Distribution of genetic variation in natural tree populations. Introduction, selection, progeny testing, species hybridization, and polyploidy to obtain superior tree populations.
- 411. Tree Physiology**
Winter. 3(3-0) BOT 301.
The fundamental principles of plant physiology with particular reference to the growth and development of woody plants, and consideration of the influence of genetic and environmental factors on physiological processes in trees.
- 424. Forest Soils**
Spring. 3(2-3) CSS 210; Juniors or approval of department. Forestry majors: FOR 305, FOR 402, FOR 425, FOR 429 concurrently. Interdepartmental with the Department of Crop and Soil Sciences.
Interrelationships of forest site and the growth of trees. Properties, classification, inventory, productivity and management of forest soils. Effects of silvicultural and forest management practices on the soil.
- 425. Forest Soils Laboratory**
Spring. 1(0-3) CSS 210; FOR 305, FOR 402, FOR 424, FOR 429 concurrently. Interdepartmental with the Department of Crop and Soil Sciences.
Exercises and field trips relating to properties, classification, inventory, productivity and management of forest soils. Extended field trips required.
- 428. Seminar**
Fall. 1(1-0) Seniors.
Current forestry topics.
- 429. Timber Harvesting**
Spring. 3(2-3) FOR 309, FOR 305, FOR 402, FOR 424, FOR 425 concurrently.
Felling, bucking and transport of trees to mill site. Capabilities and limitations of mechanical devices, vehicles, and logging systems related to timber size and terrain. Extended field trips required.
- 430. Industrial Timber Utilization Processes**
Winter. 3(2-2) FOR 429.
Mechanics and technologies of industrial wood conversion processes, including grading logs and lumber, manufacture of furniture, plywood, particleboard, fiberboard, and paper. Field trips required.
- 431. Finishing, Preservation and Drying of Wood**
Winter. 3(3-0) FOR 309.
Properties, selection, application of decorative and protective coatings, wood preservatives and fire retardants. Air and kiln drying of lumber.
- 435. Law and Resources**
Spring. 3(3-0) RD 417 or BOA 440. Interdepartmental with and administered by the Department of Resource Development.
Legal theories, cases, statutes and constitutional considerations are applied to natural resource utilization. Private and public property interests in natural resources are illustrated through case studies of use conflicts.
- 446. Range Management**
Winter of even-numbered years. 4(4-0) FOR 220 or FOR 304 or approval of department.
The science of range management, with emphasis on range regions, range vegetation management, livestock management practices, range improvements and multiple use values of rangelands.
- 450. Natural Resource Administration**
Fall. 4(4-0) Seniors; not open to forestry majors. Interdepartmental with Agriculture and Natural Resources and the departments of Fisheries and Wildlife, Park and Recreation Resources, and Resource Development.
Concepts and methods of administering wildland properties. The legal, economic and social environment. Benefit-cost analysis of management changes. Unit organization, personnel management and accounting. Presents a systems view of administration.
- 454. Forestry in International Development**
Winter. 3(3-0)
Assessment of the world's forest resources, forest products industrial development and trade, and restraints of developmental objectives on forestry goals. Issues, policy approaches, and prospects for individual countries.
- 455. Natural Resource Economics**
Fall. 4(4-0) Approval of department. Interdepartmental with Agriculture and Natural Resources and the departments of Fisheries and Wildlife, Park and Recreation Resources, and Resource Development.
Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.
- 457. Public Forest Management**
Winter. 3(2-2) FOR 455.
Integrative planning for public forest ownerships, including multiple use aspects.
- 459. Private Forest Management**
Spring. 3(2-2) FOR 457; Seniors.
Forestry as a business. Timberland acquisition, timber management planning, harvest scheduling, the legal environment, accounting and taxation. Laboratory exercises based on an existing private forestry property.
- 460. Arboriculture**
Fall. 3(2-2) Approval of department.
Principles and techniques of species selection, establishment, and cultural practices used in the care and maintenance of shade and ornamental trees. Two-day field trip required.
- 461. Urban Forestry**
Spring. 3(3-0) FOR 460 or approval of department.
Principles of urban forest management: organizational, legal, economic, cultural and environmental. Inventories, utility forestry and commercial arboriculture. Field trips required.
- 465. Forest and Wood Science Problems**
Fall, Winter, Spring, Summer. 1 to 5 credits. Seniors with a 2.80 average, or approval of department.
Special problems course for students qualified for advanced study in some phase of forestry or wood science.
- 491. Natural Resources and Modern Society**
Spring. 3(3-0) Juniors. Interdepartmental with Agriculture and Natural Resources and the Department of Resource Development.
A survey of the social and economic significance of natural resources in modern industrial and urban society. Current problems of natural resources management and use are examined in terms of the society in which they exist.
- 804. Forest Ecology**
Winter. 3(3-0) Approval of department.
Theories, methods of analysis, and discussion of current investigations of energy, nutrients, and biomass dynamics in forest ecosystems.
- 807. Special Problems**
Fall, Winter, Spring, Summer. 2 to 5 credits. May reenroll for credit with a maximum of 10 credits. Approval of department.
Advanced study in administration, biometrics, photogrammetry, dendrology, silviculture, management, economics, ecology, genetics, arboriculture, hydrology, soils, recreation, physiology, policy, entomology, products harvesting, wood preservation, timber mechanics, wood conversion, fire, range management, extension and pathology.
- 809. Natural Resources Economics**
Winter. 3(3-0) Approval of department. Interdepartmental with the Department of Resource Development.
Applications of economic analysis to natural resource problems.
- 828. Seminar**
Fall. 1(1-0)
Critical study and discussion of advanced forestry topics.
- 830. Physiological Genetics**
Winter. 3(3-0) Approval of department. Interdepartmental with the Department of Crop and Soil Sciences.
Physiological bases for genetic variation in higher plants including adaptive physiology, quantitative genetics, growth correlations, biochemical genetics, hybrid physiology, and genecology.
- 835. Silviculture**
Fall. 3(3-0) FOR 305 or approval of department.
Biological basis of intensive forest management including seedling production, site evaluation and preparation, plantation establishment, intermediate stand treatments and natural reproduction methods. Field trip optional.
- 840. Recreation Economics**
Spring. 4(4-0) FOR 809 or approval of instructor. Interdepartmental with the departments of Park and Recreation Resources, and Resource Development. Administered by the Department of Park and Recreation Resources.
Applications of economic analysis to recreation resource problems including measurement of demand and supply, valuation of recreation resources, determination of economic impact, economic decision making and policy considerations.

**Descriptions – Forestry
of
Courses**

850. Administering the Public Land Agency
Spring. 4(4-0) FOR 450 or approval of department.

Case studies of administrative problems in land management agencies. Students are organized as teams and prepare team reports on specified aspects of each case.

855. The Research Process in Natural Resources

Fall. 3(3-0) Approval of department. Interdepartmental with and administered by the Department of Resource Development.

Research and decision processes as applied in natural resource investigations. Research organization and applications of research results. Oriented to management, social science, and policy studies. Preparation of project proposals.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

909. Timber Economics

Fall of odd-numbered years. 3(3-0) FOR 457, FOR 809, EC 800, EC 801, EC 802.

Economic theory relevant to study of timber production, regional and national timber supply, demand and price, the effect of institutional factors, and other topics by review of past research.

910. Resource Economics Proseminar

Spring. 3(3-0) May reenroll for a maximum of 9 credits. Approval of department. Interdepartmental with the departments of Agricultural Economics and Resource Development.

A seminar wherein advanced graduate students in the fields of resource economics participate with faculty in the joint conduct of a major research project in resource economics and policy.

960. Simulation Models in Natural Resource Management

Winter of odd-numbered years. 3(3-0) RD 855 and knowledge of FORTRAN programming or approval of department. Interdepartmental with and administered by the Department of Resource Development.

The role of simulation models in developing management strategies. Applications of computer simulation in natural resources. Modeling of decision systems in natural resources management.

975. Least Squares Analysis and Linear Programming in Forestry Research

Fall of odd-numbered years. 4(4-0) MTH 112, STT 423, CPS 110 or CPS 120.

Application of least squares analysis and linear programming to problems in forestry research. Include both linear and nonlinear least squares models. Case studies from several forestry disciplines.

976. Multivariate Methods in Forestry Research

Winter of even-numbered years. 4(4-0) FOR 975 or approval of department.

Application of multivariate techniques such as principal components, canonical analysis, factor analysis, and clustering to problems in forestry research. Case studies drawn from several forestry disciplines.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FRENCH

See Romance and Classical Languages.

GENETICS

College of Natural Science

800. Genetics Seminar

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 12 credits. Approval of director.

Student seminar to cover genetics subjects not considered in formal courses. Course is also intended to give students experience in reviewing and organizing literature in a subject, and orally presenting and defending the analysis.

804. Gene Transmission

Fall. 3(3-0) ZOL 441 or approval of instructor.

Molecular and formal genetic studies of the replication, recombination, repair and segregation of genetic information in prokaryotes and eukaryotes. Experimental design and methodology will be emphasized.

805. Genetic Organization, Action and Regulation

Winter. 3(3-0) GEN 804.

Molecular and formal genetic studies of the organization, expression and regulation of gene activity in prokaryotes and eukaryotes. Experimental design and methodology will be emphasized.

806. Population and Quantitative Genetics

Spring. 3(3-0) ZOL 441 or approval of instructor.

Genetics of quantitative characteristics in populations with special reference to polygenic variation and its interactions with environment, gene action and its measurement, mating systems, and selection.

880. Special Problems

Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of instructor.

Students with special interests and abilities may study published literature in a selected genetics topic or they may carry on research in the laboratory on a selected subject in collaboration with genetics faculty.

890. Selected Topics in Genetics

Fall, Winter, Spring, Summer. 2 to 5 credits. May reenroll for a maximum of 9 credits. ZOL 441 and approval of instructor.

Topics will be selected from molecular genetics, physiological genetics, population genetics, quantitative genetics, evolution, radiology and mutagenesis, microbial genetics, somatic cell genetics, behavioral genetics, and human genetics.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. 3 to 12 credits. Majors.

Research for the doctoral dissertation in genetics.

GEOGRAPHY

GEO

College of Social Science

Courses are classified as follows:

Cultural--170, 201, 801, 901.
Economic--213, 409, 435, 809, 835, 906.
Field Techniques--415, 850.
Geographic Education--458.
Historical--310, 810, 910.
Independent Research--400H, 411, 818, 899, 918, 999.
Medical--470, 870, 970.
Physical--206, 206L, 429, 430, 431, 432, 451, 834, 902.
Political--170, 908.
Population--215, 320, 836, 934.
Quantitative Methods--427, 428, 811.
Regional--204, 300, 315, 316, 321, 322, 340, 342, 360, 365, 812, 912.
Recreational and Environmental--100, 307, 309, 828.
Theory and Philosophy--150, 425, 825, 826.
Urban--318, 401, 402, 403, 466, 805.
Visual Media and Techniques--122, 223, 224, 424, 426, 446.

100. Man, Location and Environment
Fall, Winter, Spring. 3(3-0)

Concepts, theory, and methods of modern Geography.

122. The World of Maps

Fall, Winter, Spring. 3(3-0)

Discussion of types, practical applications, and sources of maps.

150. Geography of Selected Current Problems

Fall, Winter, Spring. 2(2-0)

The geographic perspective is used to examine U.S. and world problems of major concern such as international conflicts, environment quality, spatial change, and economic development.

170. Future Worlds (S)

Fall, Spring, Summer. 3(3-0)

Geographical approach to environmental, biological, economic, social and political problems facing mankind between now and year 2000.

IDC. Introduction to Resource Ecology

For course description, see Interdisciplinary Courses.

201. Geography of Culture

Fall, Winter, Spring. 3(3-0)

A systematic discussion of cultural geography, stressing cultural processes and relationships.

204. World Regional Geography (S)

Fall, Winter, Spring, Summer. 4(4-0)

Man's relationship with natural and cultural environments.

206. Physical Geography

Fall, Winter, Spring, Summer. 4(4-0)

Analysis of weather, climate, landforms, soils, water and biotic factors of man's environment, including their spatial, genetic, and functional interrelationships.

206L. Physical Geography Laboratory

Fall, Winter, Spring. 1(0-2) GEO 206 or concurrently.

Laboratory study of geographic aspects of map interpretation, aerial photographs, weather, climate, soils, landforms, and vegetation.
