

Descriptions – Fisheries and Wildlife

of

Courses

425. **Wildlife Habitat Analyses**

Fall. 4(2-4) BOT 450 or ZOL 389 or FOR 220.

Evaluation of environmental factors affecting wildlife species; food and cover measurements. Determination of limiting factors.

426. **Ecology of Migratory Birds**

Fall. 4(2-4) ZOL 461 or approval of department.

Ecological, behavioral, and physiological characteristics affecting population parameters of migratory birds and applications of these relationships to the management of migratory wildlife resources.

427. **Wildlife Biology and Management**

Winter. 4(2-4) FW 424; ZOL 389 or BOT 450.

Ecology and management of resident wildlife on farm, forest and range lands.

450. **Natural Resource Administration**

Fall. 4(4-0) Seniors; not open to forestry majors. Interdepartmental with Agriculture and Natural Resources and the departments of Forestry, Park and Recreation Resources, and Resource Development. Administered by the Department of Forestry.

Concepts and methods of administering wildland properties. The legal, economic and social environment. Benefit-cost analysis of management changes. Unit organization, personnel management and accounting. Presents a systems view of administration.

455. **Natural Resource Economics**

Fall. 4(4-0) Approval of department. Interdepartmental with Agriculture and Natural Resources and the departments of Forestry, Park and Recreation Resources, and Resource Development. Administered by the Department of Forestry.

Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.

471. **Ichthyology**

Spring. 3(2-3) FW 301 or ZOL 320 or ZOL 428. Interdepartmental with the Department of Zoology.

Classification and natural history of fishes. Emphasis on food, game, and forage fishes.

473. **Fishery Biology and Management**

Fall. 5(3-3) ZOL 471.

Biology of fishes with special reference to distribution and natural history, and application of this knowledge to problems of obtaining maximum return from fishery resources.

475. **Fish Culture**

Spring. 3(3-0) FW 473.

Artificial propagation of freshwater fish including hatchery management, nutritional and environmental requirements, disease and parasite control and intensive fishery management. Utilization of hatchery stock in fisheries management.

476. **Limnology**

Winter. 3(3-0) CEM 131 and CEM 161; BOT 450 or ZOL 389. Students may not receive credit for both FW 376 and FW 476. Interdepartmental with the Department of Zoology.

Ecology of lakes and streams with special reference to physical, chemical and biological factors affecting their productivity.

477. **Limnological Methods**

Winter. 3(0-9) FW 476 concurrently; ZOL 481; ENT 301, ENT 302 recommended. Interdepartmental with the Department of Zoology.

Methods and instruments of limnological field investigation on lakes and streams.

484. **Outdoor Environmental Education**

Fall. 4(3-2) Juniors or approval of department.

Using the outdoors as a teaching laboratory for ecological studies of plant and animal communities. Designed primarily for secondary teachers.

485. **Environmental Conservation Program Design**

Winter. 3(3-0) Seniors or approval of department.

Materials and methods for integrating environmental conservation into educational programs in schools, nature centers, youth groups and communities.

801. **Seminar in Fisheries and Wildlife**

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits. Approval of department.

Graduate problems and current developments of importance.

802. **Advanced Topics**

Fall, Winter, Spring Summer. 1 to 6 credits. May reenroll for a maximum of 15 credits. Approval of department.

Study of selected advanced topics in detail and depth.

830. **Environmental Requirements of Fish**

Winter of odd-numbered years. 3(3-0) Approval of department.

Adaptations and responses of fish to environmental changes; research methods for evaluating environmental limitations and effects of pollutants on fish growth, reproduction and survival. Applications for developing water quality criteria.

871. **Ecology of Fishes**

Summer of even-numbered years. 3 credits. Approval of department. Given at the W. K. Kellogg Biological Station. Interdepartmental with and administered by the Department of Zoology.

Exploration of ecological problems with particular emphasis on growth, food and habitat selection, population biology and niche relations. Field and experimental investigations of fish communities.

873. **Ecology and Management of Stream Fish**

Winter of odd-numbered years. 3(4-0) FW 376, ZOL 389 or BOT 450; or FW 476 or concurrently.

Flowing water habitat as it affects fish, with influences of climate, vegetation, land use, water withdrawal; damming, channel alteration and fishery management.

874. **Advanced Biological Limnology**

Fall of odd-numbered years. 3(4-0) FW 477, or approval of department.

Historical and current contributions to concepts of community structure, energy flow and materials cycling in aquatic eco-systems.

875. **Chemical Limnology**

Winter. 4(3-3) FW 476, FW 477 or approval of department.

Application of analytical chemistry concepts and technologies to fundamental chemical mechanisms in natural and polluted water systems. Special consideration given to selected heterogeneous equilibria.

876. **Applied Limnology**

Spring. 3(3-0) FW 874 or FW 875 or approval of department.

Aquatic ecology: quantitative relationship between physical, chemical and biological parameters in polluted and unpolluted lakes and streams.

899. **Master's Thesis Research**

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

940. **Quantitative Wildlife Ecology**

Fall of even-numbered years. 3(3-0) Approval of department.

Fundamentals of population demographics. Rates of increase, dynamic and static life tables, logistic theory, the Leslie matrix model, age specific and time specific parameters. Current hypotheses on mechanisms promoting population stability.

999. **Doctoral Dissertation Research**

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FOOD SCIENCE AND HUMAN NUTRITION

College of Agriculture and Natural Resources College of Human Ecology

Food Science

FSC

101. **Food and Society (N)**

Fall, Winter. 3(3-0) Interdepartmental with Human Nutrition and Foods.

Analysis of the scientific, social and environmental aspects of food in determining the quality of man's life. Introduction into the principles of food preservation and safety.

205. **Food Laws and Regulations**

Spring. 3(3-0) Interdepartmental with Human Nutrition and Foods.

Food laws and regulations that govern food processing and food service systems; procedures involved in adopting and enforcing food laws and regulations.

211. **Introduction to Food Science**

Spring. 3(3-0)

Modern food processing, world food problems, and the basic characteristics of processed foods.

215. **World Food Issues**

Spring. 3(3-0) Interdepartmental with and administered by the Department of Geography.

Food resources as related to world distributions of population, soil, water, fuel and minerals. Special attention to urbanization, irrigation, and future food needs and global constraints.

- 223. Commercial Food Processing Systems**
Fall. 3(3-0) *Interdepartmental with and administered by Agricultural Engineering Technology.*
Processes and systems used in handling, processing and distribution of food; the need for processing systems and their influence on food quality.
- 242. Meats, Poultry and Fishery Products I**
Fall. 3(2-2) *Interdepartmental with the Department of Animal Husbandry.*
Principles of evaluation and nutritive value. Identification of grades and cuts of beef, pork, lamb and poultry products.
- 300. Dairy Products**
Spring. 3(2-2) CEM 132 or approval of department.
Chemical and physical properties of milk and milk products. Survey of dairy products and the technologies involved in their manufacture.
- 310. Food Safety and Microbiology**
Fall. 4(3-3) Juniors; CEM 132 or concurrently or approval of department. Not open to students with credit in FSC 440. *Interdepartmental with the Department of Microbiology and Public Health.*
Effects of food handling, preparation and service on food safety. Microorganisms in foods, sanitation, food borne disease and food service regulations.
- 311. Food Processing and Preservation**
Winter. 4(4-0) CEM 132
Effects of processing, packaging and preservation on the quality of foods. Demonstrations of use of ingredients, evaluation of products and results of various processing methods.
- 331. Physical Principles of Food Processing**
Fall, Winter. 4(3-2) FSC 211, MTH 109; PHY 239 or approval of department.
Food preservation by heat, low temperature, dehydration and radiation.
- 332. Biological Principles of Food Processing**
Winter. 4(3-3) MPH 200 or approval of department.
Biological problems related to food processing including waste disposal, sanitizing and bactericidal compounds, pesticides and residues, plant and animal growth regulators, radioactive elements, preservatives and toxicology of additives.
- 333. Chemical Principles of Food Processing**
Spring. 4(3-3) FSC 211 and CEM 241 or approval of department.
Chemical changes in foods that affect the texture, color, flavor, odor, stability, and nutritive quality during processing and storage.
- 400. Milk Processing Technology**
Fall. 4(3-3) CEM 132 or approval of department.
The fluid milk industry. Composition, quality, sanitation, nutritive value, processing, packaging and distribution of milk and milk products.
- 401. Industrial Food Fermentations**
Fall. 3(3-0) FSC 440 and organic chemistry or approval of department.
Physical, microbiological and chemical procedures in utilizing microbial cultures in controlled fermentations of foods and food constituents.
- 402. Chemistry and Technology of Lipids**
Winter. 3(3-0) One term organic chemistry.
Chemical and physical properties of edible fats and oils. Refining and processing of lipids into margarine, butter, shortening and salad oils. Chemical methods for analysis of lipids.
- 404. Dehydrated Foods**
Spring. 3(3-0) FSC 331; FSC 333 concurrently or approval of department.
Concentration and dehydration of foods by roller, spray, and freeze drying and foam, puff and tunnel drying. Stability and nutritional aspects of dehydrated foods.
- 405. Technology of Manufactured Dairy Products**
Winter. 4(3-3) FSC 400 or approval of department.
Manufacturing technology of fermented dairy foods, frozen dairy desserts, and imitation dairy products.
- 421. Food Plant Management**
Spring. 3(3-0) Seniors or approval of department.
Business and technical management concepts associated with food plants. Efficiency factors, regulatory obligations, and administrative aspects.
- 440. Food Microbiology**
Spring. 5(3-4) MPH 200 or MPH 301 or approval of department. *Interdepartmental with the Department of Microbiology and Public Health.*
Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.
- 445. Meat, Poultry and Fishery Products III**
Spring. 3(1-6) FSC 333 or approval of department.
Processing, formulation and quality control.
- 448. Fruit, Vegetable and Cereal Products I**
Fall. 4(3-3) FSC 331 or approval of department.
Quality factors involved in canning, sugar and salt preservation and milling.
- 449. Fruit, Vegetable and Cereal Products II**
Winter. 4(3-3) FSC 331 or approval of department.
Quality factors involved in cooling, freezing and other preservation procedures.
- 455. Food Analysis I**
Fall. 4(2-4) CEM 132 and CEM 162 or approval of department.
Modern methods of analysis for fat, protein, moisture and other macroconstituents of food. Application of spectrophotometry in determination of microconstituents; use of dye-binding, complexometric and iodimetric techniques in food analysis.
- 456. Food Analysis II**
Winter. 4(2-6) CEM 162 and CEM 241 or approval of department.
Use of colorimetry and spectrophotometry, chromatographic methods and other techniques for the analysis of food constituents and additives.
- 457. Quality Control in the Food Industry**
Winter of even-numbered years. 3(3-0) STT 201 or approval of department.
Organization of and tools used for quality control; control charts, acceptance and auditing inspections, critical control points, reliability, safety, recall and liability.
- 480. Special Problems in Food Science**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits.
Advanced undergraduates may select research work in food chemistry, food microbiology, food engineering, food plant management, processing dairy products, meat, poultry and fishery products, fruits and vegetables, cereals or beverages.
- 490. Seminar**
Fall. 1(1-0) Approval of department.
Preparation and presentation of reports on a specialized aspect of food science.
- 828. Food Processing Concepts, Systems and Selected New Processes**
Winter. 3(3-0) FSC 331, FSC 332, or FSC 440 or approval of department.
Concepts of and requirements for processing systems and continuous processes. Use of computers in food processing; microwave heating of foods; radiation preservation of foods and related processing methods.
- 830. Thermal Processing of Food Products**
Winter. 4(3-3) FSC 331; FSC 332 or FSC 440 or approval of department.
Heating and cooling characteristics of foods in containers, thermal resistance of microorganisms, and derivation of process times and temperatures for pasteurization and sterilization.
- 832. Microbiology of Food Processing**
Winter. 3(2-3) FSC 440 or approval of department.
Control of food spoilage and food poisoning microorganisms in food processing and the role of bacterial spores in process selection.
- 833. Advanced Food Plant Management**
Fall of even-numbered years. 3(3-0) FSC 421 or approval of department.
Advanced concepts and strategy of policies and practices in the management of food plants.
- 834. Flavor Quality Control**
Spring of odd-numbered years. 4(3-3) Approval of department.
Sensory methods used for food evaluation and panel analyses. Flavor chemistry and analytical methods. Sampling plans, control charts, and acceptance sampling for statistical quality control.
- 835. Carbohydrates in Foods**
Fall of odd-numbered years. 3(3-0) FSC 333.
The chemistry and food technology of mono-, oligo-, and poly-saccharides.

Descriptions – Food Science and Human Nutrition

of

Courses

850. Selected Topics in Food Science

Fall, Winter, Spring, Summer. 2 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.

Advanced studies; food utilization, texture, additives, toxicants, food proteins, ingredient safety, nutrient stability, new processing techniques, flavors, quality control, storage stability, state and federal food regulations.

880. Special Problems in Food Science

Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.

Investigation of food science areas of special interest to individual graduate students.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

932. Histological and Chemical Techniques

Winter. 3(1-6) Approval of department.

Research techniques in thin-layer and gas chromatography, differential thermal analysis, isoelectric focusing, histology, histochemistry, biological testing, polarography and pH measurements.

933. Instrumental Methods of Analysis

Spring. 3(2-3) FSC 455 or FSC 456 or approval of department.

Spectroscopy (ultraviolet, visible, infrared, flame, atomic absorption, fluorescence), manometry, ion exchange, countercurrent distribution, radioisotopic tracers.

934. Research Techniques with Proteins

Fall. 3(2-3) BCH 401 or BCH 451.

Physical and chemical techniques applicable to protein characterization (including -electrophoretic techniques, thin-layer chromatography, gel filtration, ultracentrifugation and amino acid analysis).

951. Muscle Biochemistry

Spring. 3(3-0) BCH 451 or approval of department.

The structure and function of living muscle. Emphasis is placed upon the chemical and energy changes of muscle in contraction. Changes occurring after death during rigor development are also discussed.

952. Advanced Lipids

Winter of even-numbered years. 3(3-0) FSC 402 or approval of department.

A course relating composition, structure, and physical and chemical properties of lipids to processing requirements of fats and oils to their function in food systems.

953. Food Enzymology

Spring of even-numbered years. 3(3-0) FSC 333, BCH 401 or approval of department.

Production, utilization and application of food enzymes in food industries. Effects of food enzymes on quality and nutrients of foods and food products.

953L. Laboratory-Food Enzymology

Spring of even-numbered years. 2(0-4) FSC 953 or concurrently or approval of department.

Research methods in the isolation, purification, and characterization of food enzymes and the use of food enzymes in food industries.

954. Chemistry of Plant Products

Fall of even-numbered years. 3(3-0) FSC 333, BCH 451, or approval of instructor.

Chemistry and biochemistry of plant pigments, tannins, toxins and proteins.

990. Food Science Seminar

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits toward M.S. and 6 credits toward the Ph.D. Approval of department.

Preparation and presentation of reports on a specialized aspect of research findings in food science.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Human Nutrition and Foods

HNF

100. Elementary Food Preparation

Fall, Winter, Spring. 4(2-4)

Composition and properties of food related to quality characteristics; methods of preparation, evaluation of quality and use of selected foods.

101. Food and Society

Fall, Winter. 3(3-0) Interdepartmental with and administered by Food Science.

Analysis of the scientific, social and environmental aspects of food in determining the quality of man's life. Introduction into the principles of food preservation and safety.

102. Nutrition for Man (N)

Fall, Winter, Spring. 3(3-0)

Fundamentals of nutrition with reference to diverse ways man provides for and attaches meaning to his food.

200. Physical and Chemical Properties of Foods

Fall, Winter. 4(2-4) CEM 131 or concurrently, or CEM 141.

Interrelationships between basic physical and chemical principles and food preparation: composition, methods of preparation, evaluation, quality standards and comparative analysis.

205. Food Laws and Regulations

Spring. 3(3-0) Interdepartmental with and administered by Food Science.

Food laws and regulations that govern food processing and food service systems; procedures involved in adopting and enforcing food laws and regulations.

221. Food and the Consumer

Fall, Winter, Spring. 3(3-0) Sophomores or approval of department.

Factors affecting the food supply, consumer protection, food buying and management of human and material resources in feeding the family.

222. Food and the Consumer Laboratory

Fall, Winter, Spring. 2(0-4) HNF 221 or concurrently.

Decision making in Foods and Nutrition with emphasis on food choices in the marketplace. Management of human and nonhuman resources in food consumerism activities.

290. Professional Literature I

Fall, Winter. 2(2-0) HNF 102 or HNF 100 or HNF 200 or FSC 101, Sophomores; departmental majors.

Identification of factors and development of analytical skills involved in evaluating and communicating scientific information.

300. Experimental Foods

Winter, Spring. 4(2-6) HNF 200, CEM 132; FSC 310 or concurrently.

Experimental approach to the study of foods, relating chemical and physical properties to reactions and processes occurring in food in response to various treatments.

302. Dynamics in Dietetics II

Winter. 2(0-4) Approval of department, HNF 301, HNF 320 or concurrently and HNF 462 concurrently.

Principles and practices in the duties of professionally qualified dietitians with focus on providing food service for groups and nutritional care for patients and/or clients. Local field trips required.

Approved through Winter 1982.

303. Dynamics in Dietetics III

Spring. 2(0-4) HNF 302; HNF 470 concurrently.

Principles and practice of instructional design and instruction applied to problems in dietetics. Local field trips required.

Approved through Fall 1981.

310. Sensory Assessment of Foods

Winter. 2(1-2) HNF 290, HNF 300 or concurrently.

Sensory perception, chemistry of food flavors, and methods used in organoleptic evaluation of foods.

312. Nutrient Composition of Foods

Winter, Summer. 1(0-2) HNF 102 or FSC 101.

Sources of nutrient composition information and their use in menu planning. Choosing foods to meet nutrient needs of various groups.

315. Consumer Aspects of Food Consumption

Fall. 3(3-0) HNF 102 or FSC 101; EC 200.

Economic issues of concern to consumers in the food marketplace; human resource allocation to consumer food consumption activities; federal food programs affecting consumers' nutritional status.

319. Food Service Systems: General Survey

Fall, Winter, Spring. 3(3-0) HNF 222 or concurrently; or approval of department.

Factors which influence the design of food service systems. Comparison of systems as related to organizational objectives and responsibilities, operational resources (material, human) and consumer acceptance factors.

321. Food Service Management: Material Resources

Fall, Winter, Spring. 3(2-2) HNF 319 or approval of department.

Principles, processes and operational control strategies in materials management in food service systems. Menu planning, procurement, on-premise storage and issue, production, consumer distribution, safety, sanitation, and material cost analysis.

330. Nutrition in the Life Cycle: Children

Winter. 3(3-0) HNF 102; FCS 262A, three terms of natural science or approval of department.

Functions and importance of nutrients to physical growth, development and health of the child. Eating behavior of children. Feeding in child care centers.

- 375. Community Nutrition**
(475.) Fall. 3(3-0) HNF 102 or approval of department.
Identification of nutritional needs of population groups and available resources in communities.
- 400H. Honors Work**
Fall, Winter, Spring, Summer. Variable credit. May reenroll for a maximum of 16 credits. Seniors, approval of department.
- 403. Fats and Carbohydrates in Food Systems**
Fall. 4(3-3) HNF 300 or approval of department.
Chemical and physical reactions in fat and carbohydrate food systems, including sols, gels, emulsions, etc. Food evaluation techniques will be introduced.
- 404. Role of Proteins in Food Systems**
Winter. 4(3-3) HNF 300 or approval of department.
Physical and chemical reactions with protein foods, meats, eggs, cheese, seeds. Emphasis on time-temperature data in relation to quality.
- 406. Cultural Aspects of Food**
Spring, Summer of odd-numbered years. 3(3-0) Juniors.
A cross cultural investigation of food and its consumption. Factors such as history, religion, food sources and socio-economic status are considered.
- 406L. Laboratory-Cultural Aspects of Food**
Spring. 1(0-3) HNF 100 or HNF 200 or approval of department; HNF 406 concurrently.
Art and science of cookery in relation to historical, national, regional, racial and religious customs.
- 407. Interactions of Culture and Nutrition**
Fall. 3(3-0) Juniors; HNF 102 or ANP 171 or approval of instructor. Interdepartmental with the Department of Anthropology.
World and U.S. food behavior focusing on conflicts between behavior and nutritional needs at various stages of life cycle. Anthropological, psychological and social influences affecting food behavior are analyzed.
- 411. Principles of Human Nutrition**
Winter, Summer. 4(3-2) BCH 200.
Identification, function and food sources of nutrients required by man. Metabolism as affected by deficiency or excess of specific nutrients.
- 420. Food Service Management: Human Resources**
Fall, Winter, Summer of odd-numbered years. 3(2-2) HNF 321 and PSY 356 or approval of department.
Principles, processes and operational control strategies in personnel management in food service systems. Hiring, training, and dismissal procedures; labor-management relations; task analysis and distribution; productivity assessment; and labor cost analysis.
- 421. Food Service Management: Problem Analysis and Decision Making**
Winter, Spring, Summer of even-numbered years. 3(1-4) HNF 420 or approval of department.
Analysis of selected food service problem situations. Application of problem-solving techniques, identification of cause and effect factors, analysis of situational components and development of remedial alternatives for administrative action.
- 454. Readings in Foods**
Fall. Summer of even-numbered years. 3(3-0) HNF 300 or approval of department.
Selected topics in foods research. Emphasis on experimental data and basic scientific principles related to food quality.
Approved through Summer 1982.
- 461. Energy Nutrients and Proteins for Human Nutrition**
Fall. 4(4-0) BCH 200; PSL 432 or PSL 241.
Metabolism of protein, fats and carbohydrates as applied to the nutritional requirements and food supplies of people.
- 462. Vitamins and Minerals for Human Nutrition**
Winter. 3(3-0) HNF 461.
Metabolism of vitamins and minerals as applied to the nutritional requirements and food supplies of people.
- 463. Nutrition and Human Development**
Spring. 4(3-2) HNF 462 or approval of department.
The role of nutrients in physiological systems and biochemical processes as related to the perspective of human growth and development.
- 465. Readings in Nutrition**
(453.) Winter. Summer of odd-numbered years. 3(3-0) HNF 462 or approval of department.
A study of recent developments in research in human nutrition.
Approved through Fall 1982.
- 470. Clinical Nutrition**
Fall. 3(3-0) HNF 462; PHM 350 or approval of department.
Changes in physiological and/or biochemical functions or processes due to illness and uses of modified diets as an essential part of treatment.
- 470P. Clinical Nutrition Practicum**
Fall. 1(0-2) 470 concurrently.
Assessment of nutritional status. Modification of the hospital general menu for implementation of diets prescribed for treatment of disease.
- 473. Interpretation of Clinical Laboratory Tests in Dietetics**
Winter. 4(3-2) HNF 470 or concurrently.
Principles, procedures and interpretation of clinical laboratory methods with particular emphasis on their interpretation relative to nutritional status and therapeutic nutrition.
- 475P. Community Nutrition Fieldwork**
Fall, Winter, Spring, Summer. 1(0-3) Seniors; HNF 375 or concurrently.
Application of community nutrition principles in field settings. Instructor arranged projects in nutrition survey techniques or delivery of nutrition education services.
- 478. Dietetics: Theory-Practice Interrelationships I**
Winter. 3(2-3) HNF 321, HNF 470, ED 414 or F E 340.
Introduction and practice of competencies required of the professional dietitian. Skills in communication, interviewing, problem solving and planning for nutritional care will be developed using simulated and real life situations.
- 479. Dietetics: Theory-Practice Interrelationships II**
Spring. 3(2-3) HNF 478.
Continuation of HNF 478. Skills in nutritional and employee counseling, resource management and professional behavior will be developed using simulated and real life situations.
- 480. Practice of Dietetics**
Fall, Winter, Spring, Summer. 12(2-30) May reenroll for a maximum of 24 credits. HNF 303, HNF 470.
Application and integration of nutritional and managerial concepts related to the practice of dietetics.
- 490A. Professional Literature II: Foods**
Fall. 2(2-0) HNF 290, HNF 300 or HNF 403 or approval of department.
Selected topics in foods research. Emphasis on experimental data and basic scientific principles related to food quality, nutritive stability and food safety.
- 490B. Professional Literature II: Nutrition**
Spring. Summer of even-numbered years. 2(2-0) HNF 290, HNF 462 or approval of department.
Emphasis on experimental data and scientific principles related to basic nutrition research. Focus on current developments in nutrient requirements, metabolism and interactions
- 490C. Professional Literature II: Clinical Nutrition**
Winter. 2(2-0) HNF 290, HNF 470 or approval of department.
Selected topics in clinical nutrition research. Emphasis on human investigative data and scientific principles related to nutritional care of patients/clients including pathophysiologic correlations, nutritional assessment, diet planning, nutrition counseling.
- 490D. Professional Literature II: Food Service Management**
Spring, Summer. 2(2-0) HNF 290, HNF 420 or concurrently or approval of department.
Examination of trends, problems and research in food service systems operation. Focus on current issues and developments relating to materials handling, manpower needs, operational accountability and public responsibility.
- 490E. Professional Literature II: Foods and Nutrition Information**
Spring. Summer of odd-numbered years. 2(2-0) HNF 290, HNF 411 or HNF 462 or approval of department.
Selected topics in foods and nutrition information. Emphasis on research related to method and effectiveness of nutrition education.
- 495. Independent Study**
Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits. Seniors; approval of department.
Individual study of selected topics in foods, nutrition and food service management under staff guidance.
- 498. Field Study**
Fall, Winter, Spring, Summer. 4 to 12 credits. May reenroll for a maximum of 12 credits. Approval of department.
Planned program of research, observation, study or work in selected organizations under staff guidance.

Descriptions – Food Science and Human Nutrition

of Courses

800. Seminar in Foods and Nutrition
Fall, Winter, Spring, 1(1-0) HNF 403 or
HNF 463.

**802. Seminar in Food Service
Management**
Spring, 2 to 4 credits. May reenroll for
a maximum of 4 credits. Approval of depart-
ment.

**803. Problems in Food Service
Management**
Fall, Winter, Spring, Summer. Vari-
able credit. Approval of department.

805. Experimental Foods III
Spring, 4(1-9) HNF 404 or approval of
department.
Planning, executing, and reporting individual
research project. Data collection, evaluation and
interpretation to demonstrate understanding of
research techniques and attitudes, and an
awareness of significant problems in the field.

813A. Special Studies in Nutrition
Fall, Winter, Spring, Summer. Vari-
able credit. HNF 461.

**813B. Special Studies in Experimental
Foods**
Fall, Winter, Spring, Summer of odd-
numbered years. Variable credit. HNF 404;
BCH 200 or BCH 451 and BCH 804.

**813C. Special Studies in Food Service
Management**
Fall, Winter, Spring, Summer. Vari-
able credit. Approval of department.
Special studies in facility management, man-
power coordination and tools and methods of
operational control.

816. Applied Human Nutrition
Spring, 3(3-0) HNF 462.

840. Topics in Nutrition
Fall, Winter, Spring, Summer, 2 to 3
credits. HNF 462, PSL 432, BCH 401.
Advanced studies in nutrition: assessment and
surveillance, community, clinical, growth and
development, oral health, obesity, aging, diet.

841. Nutrition and Obesity
Winter of even-numbered years. 2(2-0)
One undergraduate course in nutrition,
biochemistry or physiology.
Assessment, energy metabolism, and risk factors
associated with obesity. Significance of nutri-
tion and other factors for weight control and
reduction.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Vari-
able credit. Approval of department.

**921. Pathology of Nutritional and
Metabolic Diseases**
Spring of odd-numbered years. 4(3-2)
Approval of department; PTH 404 or ANT 420.
ANS 525, BCH 452, HNF 462 recommended.
Interdepartmental with and administered by
the Department of Large Animal Surgery and
Medicine.
Development, physiopathology and mor-
phologic pathology of nutritional and metabolic
diseases including carbohydrate, protein, fatty
acid, vitamin and mineral deficiencies, their ex-
perimental induction and their medical or eco-
nomic significance.

**926. Comparative Nutrition--Lipids
and Carbohydrates**
Winter of odd-numbered years. 4(4-0)
BCH 452 and a previous course on principles of
nutrition. Interdepartmental with Animal Hus-
bandry.

Regulatory aspects of carbohydrate and lipid
metabolism as influenced by nutrition in mam-
mals. Emphasis on normal and abnormal physi-
ological states such as obesity, ketosis and dia-
betes.

**927. Comparative Nutrition--Protein
Metabolism and Developmental
Biology**
Winter of even-numbered years. 4(4-0)
BCH 452, PSL 802 or concurrently. Inter-
departmental with Animal Husbandry.

Protein quality assessment, protein status, pro-
tein calorie malnutrition, amino acid
metabolism, protein turnover, digestion and ab-
sorption, hormonal control of protein
metabolism, developmental aspects of protein
metabolism and growth.

928. Comparative Nutrition--Minerals
Spring of even-numbered years. 3
credits. BCH 452, PSL 802. Interdepartmental
with and administered by Animal Husbandry.

Forms and location in body, metabolic roles,
deficiency and toxicity signs, interrelationships,
requirements and biological availability of
sources.

**929. Comparative
Nutrition--Vitamins**
Spring of odd-numbered years. 3(3-0)
BCH 452 and a previous course on principles of
nutrition. Interdepartmental with and adminis-
tered by Animal Husbandry.

Chemical and physical properties, standards of
activity, occurrence, metabolic roles, antivita-
mins, deficiency and toxicity signs, require-
ments and factors affecting requirements.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Vari-
able credit. Approval of department.

FORESTRY FOR College of Agriculture and Natural Resources

In 305, 306, 402 and 430, field trips are sched-
uled for several consecutive days away from the
campus for integrated field experience, primar-
ily in the second half of spring term of the junior
year, so that these courses must be taken con-
currently. This precludes enrollment in other
courses during that term. The approximate cost
of these field trips is \$200.

**IDC. Introduction to Resource
Ecology**
For course description, see Interdisci-
plinary Courses.

202. Introduction to Forestry
Fall, Spring, 3(3-0)

Forestry in its broadest sense, including: his-
toric development, forest growth, protection and
management, products, national and world
economy and policy. Emphasis on multiple use
concepts. One-day field trip required.

204. Forest Vegetation
Fall, Spring, 5(3-4)

Nomenclature, classification, and identification
of important trees, shrubs, and herbaceous
plants of forest and field.

220. Plants and Their Environment
Winter, 3(3-0) Intedepartmental with
Agriculture and Natural Resources.

Relationships between plants and fundamental
climatic, edaphic, and biotic factors; structure
and function of different ecosystems in relation
to environmental factors.

**301. Quantitative Methods for
Natural Resources**

Winter, 4(3-2) MTH 109 or MTH 111.
Collection and analysis of information pertain-
ing to natural resources. Survey design, field
procedures, equipment, and analytical tech-
niques.

304. Forest Ecology
Fall, 4(3-3) FOR 204; BOT 205; CSS
210 or concurrently.

The forest is viewed as a biological community.
Forest site relationships are quantified by exam-
ining the existing physical environment and re-
lating it to the forest species occupying that
community.

305. Silviculture
Spring, 4(3-3) FOR 204, FOR 304, FOR
402, FOR 424, FOR 425, FOR 429 concurrently.
Natural and artificial forest reproduction
methods; intermediate stand treatments; non-
timber aspects of silviculture; field studies of
silvicultural methods. Extended field trips re-
quired.

306. Forest Fire Protection and Use
Winter of odd-numbered years. 3(2-3)
Juniors or approval of department.

Causes and effects of forest fires. Combustion,
fire behavior and fire weather. Prevention and
control planning and techniques. Fire in forest
land management.

309. Wood Technology
Fall, 4(3-3)

Structure of wood. Mechanical and physical
properties of wood. Wood anatomy and relation
to growth.

310. Wood Structure and Properties
Spring, 3(2-2) Not open to Forestry
majors.

Properties of wood important in its utilization,
including anatomy, moisture relations, natural
defects, strength, insect and fungus susceptibil-
ity. Composite wood products and wood fast-
eners.
Approved through Spring 1982.

402. Forest Inventory
Spring, 4(2-4) FOR 301, FOR 305, FOR
424, FOR 425, FOR 429 concurrently.

Field and office techniques of forest inventory,
with primary emphasis on timber resources. Ex-
tended field trips required.
