DESCRIPTIONS of COURSES 1990-91

This section provides descriptions of all courses given by the University at both the undergraduate and graduate levels. The courses are listed in the schools and departments which give the instruction. The schools and departments are arranged in alphabetical sequence.

Refer to the statements on *credits* and *Course Formats* and *Credits* in the Academic Programs section of the catalog.

COURSE NUMBERS

001-099 Non-Credit Courses

Courses with these numbers are offered by the University to permit students to make up deficiencies in previous training or to improve their facility in certain basic skills without earning credit.

For information about remedial-developmental-preparatory courses, consult the *Academic Programs* section of the catalog.

100-299 Undergraduate Courses

Courses with these numbers are for undergraduate students. They carry no graduate credit, although graduate students may be admitted to such courses in order to make up prerequisites or to gain a foundation for advanced courses.

For information about remedial-developmental-preparatory courses, consult the *Academic Programs* section of the catalog.

300-499 Advanced Undergraduate Courses

Courses with these numbers are for advanced undergraduate students. They constitute the advanced portion of an undergraduate program leading to the bachelor's degree. A graduate student may carry 400 level courses for credit upon approval of the student's major department and the department offering the course. In exceptional cases, a graduate student may petition the dean of his or her college, in writing, for approval of a 300 level course for graduate credit.

500-699 Graduate-Professional Courses

Courses with these numbers are courses in the graduateprofessional programs. A graduate student may carry these courses for credit with approval of the major department.

800-899 Graduate Courses

Courses with these numbers are for graduate students. Advanced undergraduates with a 3.00 or better gradepoint average in their total programs may be admitted to 800-899 level courses; others, if recommended by their academic adviser and approved by their dean. At least 23 credits of the total required for a master's degree shall be taken at the 800 and 900 level except as specifically exempted by the dean of the college.

900-999 Advanced Graduate Courses

Courses with these numbers are exclusively for graduate students and primarily for advanced graduate students. A master's degree candidate may take these courses with the approval of the major department, with the exception of courses numbered 999 (doctoral dissertation research). Admission to a doctoral degree program is a prerequisite of all courses numbered 999.

VARIABLE CREDIT COURSES

For each variable credit course, the range of credits for which a student may enroll in a given term shall be specified.

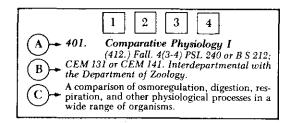

Except for courses numbered 899 (Master's Thesis Research) and 999 (Doctoral Dissertation Research), the maximum number of credits that a student may earn in a course with a reenrollment provision shall be specified.

MULTITITLED COURSES

A multititled course is one that has been approved as such by the Academic Council upon recommendation of the Full Committee, University Committee on Curriculum (UCC). Approval of a course as a multititled course shall include authorization for subtitles for the course to be established. Approved subtitles shall have the same status as separately approved courses that are included in the *Descriptions of Courses* section of the University catalog. For example, an approved subtitle shall be included in the *Schedule of Courses* in place of the general, authorized title for the multititled course and shall appear on students' academic records (including transcripts). Multititled courses are identified as such by the coding '(MTC)' after the course titles.

Multititled courses may have approved subtitles. A subtitle of a multititled course represents a subject matter area that is related to the course and that has been approved as a subtitle for that course by the Full Committee, UCC, upon recommendation of the appropriate UCC subcommittee.

COURSE LISTINGS

This material has three categories.

- (A) The course number and title including:
 - The course number suffix:

H – Honors Course	
1 - Type I	
2 — Type II	Remedial-Develop-
3 — Type III	mental-Preparatory
4 — Type IV	Courses,
5 — Type V	

For additional information about remedial-developmental-preparatory courses, consult the Academic *Programs* section of the catalog.

> The General Education designation code in parentheses following the title:

ALPHA

- (A) Arts and Humanities
- (N) Biological, Physical, and
 - Mathematical Sciences
- (S) Social and Behavioral Sciences.

For additional information, refer to the section on Courses Approved for General Education Designation beginning on page A-3.

The multititled course designation code in parentheses (MTC) following the title of any course that has been approved as a multititled course.

The material in italics which includes:

B

1 The former course number in parentheses if the course number has been changed within the past 5 years.

2 The term or terms the course is authorized to be given. Lack of staff or low student enrollment may preclude offering the course, particularly at the advanced level, every term for which it is authorized.

3 The term credits are designated to include class hours a week as follows: A(B-C) where:

A = Number of term (quarter) credits.

B = Number of class hours a week in lecture, recitation, quiz, etc., sections.

С = Number of class hours a week in laboratory.

If the credit is indicated to be variable, the number of credits is to be determined at the time of enrollment. If the course is a non-credit course, the credit-equivalent is given in brackets.

4 The course number(s) or other information indicates the preparation or classification prerequisite to enrollment in the course. If a course alpha code and number are listed, the reference is to a course indicated by the code. The alpha codes and the corresponding names are listed on this page. The prerequisite may be satisfied by the course or courses indicated or equivalent background. If a class standing such as juniors is listed, only students with that or a higher class level are eligible for enrollment. A student who is unsure of eligibility for enrolling in a course should contact the department, school, or college that administers the course.

A brief description of the course.

Course Alpha Code Designations

The codes are listed in alphabetical order. The departments are listed in alphabetical sequence by their names in the pages which follow.

GROUPINGS OF COURSES APPROVED FOR GENERAL EDUCATION CREDIT'

Each student must earn a minimum of 45 credits in courses approved for general education or in approved substitutes.

Nine of the required 45 credits in general education must be earned by completing appropriate courses in the area of written communication in the Department of American Thought and Language or an approved substitute.

For the reamining 36 credits each student must earn no fewer than 9 and no more than 16 credits, including any approved substitute, in each of the three areas: arts and humanities; biological, physical, and mathematical sciences; and social and behavioral sciences. All such credits, except those in an approved substitute, must be earned in courses approved for General Education and arranged within either Option A or Option B for each area. If the student's General Education credits do not total 36 after completing the minimum prescribed credits in each of these three areas, the student may complete the 36 credit requirement by electing a course approved for General Education from any of the three areas.

The planned groupings of courses approved for General

Education in the arts and humanities and social and behavioral sciences areas are arranged according to:

- Option A groupings of courses arranged as three term sequences/series representing a broadly integrative perspective on selected topics or issues.
- Option B groupings of courses arranged according to specific emphases representing selected approaches to knowledge within the relevant area or emphases on topics or issues within the area.

The planned groupings of courses approved for General Education in the biological, physical, and mathematical sciences correspond to Option B as described above.

The General Education courses that are offered each term are included in the appropriate departmental listings in the Schedule of Courses. For additional information concerning the University's general education requirements, refer to the Academic Programs section of the University Catalog.

Any course that had General Education approval, but no longer has Ceneral Education approval, will be counted toward the General Education requirements if the course was completed during the period for which it had General Education approval. Any student who completed such a course should consult his or her academic adviser regarding the completion of the General Education requirements.

On April 15, 1986, the Academic Council approved a change in the 1980 General Education Policy on the substitution of certain alternative courses for those approved for General Education designation in the area closest to the student's major and mandated that the change be implemented no earlier than Fall Term 1987 and no later than Fall Term 1988. Students should consult departments, schools, and colleges on what, if any, General Education substitutions are available to them.

GROUPINGS OF GENERAL EDUCATION COURSES IN THE ARTS AND HUMANITIES

Students complete either Option A or Option B

Option A — Students take all three courses in one of the following series/sequences. Additional series/sequences of courses are available to students who elect to complete three courses in the Department of Humanities; each such series/sequence is comprised of three courses, one of which ends in number 1, one of which ends in number 2, and one of which ends in number 3.

CREDITS

¹ Courses approved for General Education by the Academic Council will be counted toward the General Education requirements in accordance with the effective date for General Education approval. No course that was offered prior to the effective date for General Education approval shall be counted toward the requirements.

### GROUPINGS OF GENERAL EDUCATION COURSES IN THE BIOLOGICAL, PHYSICAL, AND MATHEMATICAL SCIENCES¹

Students complete a minimum of three courses; at least one course must be from each of the two major emphases and at least one course must include a laboratory experience.

Only one of the following courses may be counted toward the General Education requirement: N S 122, N S 125, N S 162. Students may not receive credit in more than one of the following courses: AST 119, AST 217, AST 229,¹ N S 135, N S 155, N S 1834. Students may not receive credit for both N S 115 and N S 1814. Students may not receive credit for both N S 125 and N S 1824.

¹ AST 229 is not approved for General Education designation; therefore, this course may not be counted toward the General Education requirement.
² N S 1814, N S 1824, and N S 1834 are designed for students who are enrolled in the Remedial-Developmental Writing Program. The General Education requirement in the Biological, Physical, and Mathematical Sciences may be met by completing N S 1814, N S 1824, and N S 1834.
³ N S 171H, N S 172H, and N S 173H are designed for honors students. The General Education requirement in the Biological, Physical, and Mathematical Sciences may be met by completing N S 171H, N S 172H, and N S 173H.
