

CHEMICAL ENGINEERING CHE

Department of Chemical Engineering College of Engineering

- 340. Residential Design Evaluation**
Fall. 3(3-0)
P: BCM 126 or HED 160. R: Not open to freshmen and sophomores. Open only to Building Construction Management and Human Environment and Design majors. Qualitative methods for evaluating residential building designs. Design impacts on building occupants: children, families, singles, handicappers, elderly.
- 349. Construction Renovation**
Spring. 3(3-0)
P: BCM 227. R: Open only to Building Construction Management or Human Environment and Design majors or to juniors and seniors in Historic Preservation Specialization.
Preservation, rehabilitation, remodeling and restoration of existing buildings. Analysis of building adaptability and design. Economic feasibility and codes. Historical and social considerations.
- 422. Construction Contracts**
Fall, Spring. 3(3-0)
P: BCM 227, BCM 311, BCM 324. R: Open only to seniors and graduate students in Building Construction Management and Civil Engineering.
Construction contracts for commercial and residential projects. Contract procedures, bidding, changes, substitutions. Insurance, bonding, claims, disputes, and payments. Specifications. Responsibilities of owner and contractors.
- 423. Construction Project Management**
Fall, Spring. 3(3-0)
P: BCM 311, BCM 324. R: Open only to seniors and graduate students in Building Construction Management and Civil Engineering.
Construction management principles and practices. Site and project management.
- 451. Concepts of Fire Safe Construction**
Fall. 3(3-0)
P: BCM 230 or HED 350. R: Open only to Building Construction Management majors.
Safety and fire integrity of structures: principles, terminology, and techniques of construction affecting life. Applicable codes. Materials and assemblies. Suppression and detection systems.
- 452. Commercial Utility Systems**
Spring. 3(3-0)
P: BCM 230. R: Open only to Building Construction Management, Mechanical Engineering, Civil Engineering, and Human Environment and Design majors.
Primary electrical, heating, ventilating, air conditioning, plumbing, elevator, and fire detection and suppression systems for commercial buildings.
- 453. Land Development**
Spring. 3(3-0)
P: BCM 227, BCM 325. R: Open only to Building Construction Management, Civil Engineering, History of Art, Landscape Architecture, and Urban Planning majors.
Methods and practices of land development for residential and commercial uses. Market research. Land use regulations. Legal documentation. Site analysis and design. Case studies.
- 490. Independent Study**
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
R: Open only to Building Construction Management majors. Approval of department; application required.
Special problems in acquisition and development of residential land, design, construction technology, building materials, finance, marketing, construction management, or land use codes and regulations.
- 491. Special Topics in Building Construction Management**
Fall, Spring. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
P: BCM 227 or BCM 311. R: Open only to Building Construction Management majors. Approval of department.
Topics such as computer methods in building construction management, construction technology, solar energy, special land use codes or new technology management.
- 811. Advanced Project Scheduling**
Fall of odd-numbered years. 3(2- 2)
Critical path analysis for effective and logical scheduling of construction projects. Identification of project activities and their relationships. Schedule development, analysis, and updating. Relationship of project costs and resources to the schedule. Effective communication of schedule information.
- 823. Advanced Construction Project Management**
Spring of even-numbered years. 3(3-0)
P: BCM 422, BCM 423; or CE 373, CE 471. R: Open only to graduate students in Building Construction Management or Civil Engineering.
Project management issues, services, documentation, risk assessment. Bidding, cost accounting, scheduling. Dispute resolution and liability case studies.
- 890. Special Problems**
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 4 credits in all enrollments for this course.
R: Open only to graduate students in College of Agriculture and Natural Resources. Approval of department; application required.
Individual study in land acquisition and development, design, construction, management, finance, marketing, and structural analysis.
- 891. Advanced Topics in Building Construction Management**
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
R: Open only to graduate students in College of Agriculture and Natural Resources. Approval of department.
Advanced topics in building construction management.
- 892. Construction Management Seminar**
Fall. 1(1-0)
R: Open only to graduate students in College of Agriculture and Natural Resources or College of Engineering.
Current topics and issues in construction management. Construction methods and materials and building design.
- 899. Master's Thesis Research**
Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 99 credits in all enrollments for this course.
R: Open only to graduate students in Building Construction Management.
- 201. Material and Energy Balances**
Fall, Spring. 3(4-0)
P: MTH 133, CEM 142 or CEM 152, CPS 131 or CPS 130 or concurrently. R: Open only to students in the College of Engineering.
Chemical engineering calculations. Synthesis of chemical process systems. Analysis of chemical processes using material and energy balances. Enthalpy calculations for changes in temperature, phase transitions, and chemical reactions.
- 311. Fluid Flow and Heat Transfer**
Spring. 4(5-0)
P: CHE 201 or concurrently, MTH 235 or concurrently. R: Open only to College of Engineering students. Not open to students with credit in ME 201 or MSM 351.
Thermodynamics of fluid flow. Laminar and turbulent flow. Design of flow systems. Heat transfer in solids and flowing fluids. Interphase heat transfer. Radiant heat transfer. Multiple effect evaporation. Design of heat exchange equipment.
- 312. Mass Transfer and Separations**
Fall. 4(5-0)
P: CHE 201 or concurrently, MTH 235 or concurrently. R: Open only to College of Engineering students.
Diffusion. Mass transfer coefficients. Design of countercurrent separation systems, both stagewise and continuous. Distillation, absorption, extraction. Multicomponent separations. Batch processes. Computer-aided design methods.
- 316. Unit Operations Laboratory**
Spring. 3(1-6)
P: CHE 311 or concurrently; CHE 312; CHE 321 or concurrently. R: Open only to Chemical Engineering and Food Engineering majors. Completion of Tier I writing requirement.
Momentum, heat, and mass transfer. Separation processes: distillation, filtration, and drying. Reactor kinetics. Automatic process control. Laboratory problems requiring team effort.
- 321. Thermodynamics for Chemical Engineering**
Spring. 4(5-0)
P: CHE 201. R: Open only to College of Engineering students.
First and second laws. Thermodynamics of flow and energy conversion processes. Properties of single and multi-component systems. Phase equilibria. Chemical equilibria in reacting systems.
- 371. Chemical Engineering Materials**
Fall. 3(3-0)
P: CEM 352; CEM 361 or concurrently. R: Open only to Chemical Engineering majors.
Structure, properties, and performance of classes of materials emphasizing polymeric materials.
- 422. Transport Phenomena**
Spring. 3(3-0)
P: CHE 311, CHE 312; or FE 485. R: Open only to Chemical Engineering and Food Engineering majors.
Mathematical and physical analogies among mass, energy and momentum transfer processes. Dimensional analysis and solutions to multivariable boundary value problems. Numerical solutions to nonlinear problems.

Descriptions — Chemical Engineering of Courses

431. Chemical Reaction Engineering Spring, 3(3-0)

P: CHE 311 or concurrently; CHE 312; CHE 321 or concurrently. R: Open only to Chemical Engineering majors.

Design and analysis of homogeneous flow and batch reactors. Chemical kinetics and equilibria. Reaction rate expressions from mechanisms and experimental data. Mass and heat transfer in heterogeneous reactors. Heterogeneous reactor design. Catalysis.

432. Process Dynamics and Control Fall, 3(3-0)

P: CHE 431. R: Open only to Chemical Engineering majors.

Mathematical modeling of process dynamics. Control theory. Design of control systems and specification of control hardware. Integration of control theory with modern practice.

433. Process Design and Optimization I Fall, 3(4-0)

P: CHE 431, CHE 432 or concurrently. R: Open only to Chemical Engineering majors. Completion of Tier I writing requirement.

Applications of chemical engineering principles in design calculations. Selection of optimum design. Influence of design on capital investment, operating cost, product loss and quality. Mathematical programming methods for optimization.

434. Process Design and Optimization II Spring, 3(4-0)

P: CHE 433. R: Open only to Chemical Engineering majors.

Integrated design of chemical engineering processes. Process and project engineering. Instrumentation and control systems. Flowsheet layout and optimization. Process simulation.

435. Biological Transport Mechanisms

Fall of odd-numbered years. 3(3-0) Interdepartmental with Biomedical Engineering and Mechanical Engineering. Administered by Biomedical Engineering.

P: BME 311, MTH 235.

Mechanisms of transport of momentum, heat and mass. Mathematical description of transport processes in biological systems. Solution of biomedical problems.

472. Composite Materials Processing Fall, 3(2-3)

P: CHE 311 or ME 332 or CE 321. R: Open only to College of Engineering majors.

Manufacturing processes for thermoset and thermoplastic matrix composites. Mechanical and thermal evaluation of composites. Rheology and molding of fiber-filled materials.

481. Biochemical Engineering Fall, 3(2-3)

P: CHE 431. R: Open only to College of Engineering majors.

Applications of microbiology and biochemistry to biochemical engineering. Kinetics and thermodynamics of biochemical reactors. Transport phenomena in biological systems. Bioreactor design and scale-up.

490. Independent Study

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors. Approval of department.

Theoretical or experimental studies of current research topics in chemical engineering. Individual interaction with faculty adviser.

491. Selected Topics in Chemical Engineering

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors. Study of newly-developing or non-traditional chemical engineering topics in a classroom environment.

801. Advanced Chemical Engineering Calculations Fall, 3(3-0)

P: CHE 431.

Formulation of differential equations modelling physical phenomena in chemical engineering. Application of analytical and numerical solution methods. Interpretation of solutions.

804. Thermodynamics and Kinetics in Chemical Engineering Summer, 3(2-2)

R: Approval of department.

Mass and energy balances in batch, continuous and open systems. Process thermodynamics. Cryogenics. Properties of substances and mixtures. Phase equilibria. Chemical reaction equilibria. Chemical reactor kinetics. Process design orientation.

805. Transport and Separation Processes Summer, 3(2-2)

R: Approval of department.

Momentum, energy, and mass transfer. Laminar and turbulent flow. Fluid friction. Dimensional analysis. Heat transfer in stationary and flowing materials. Interchanges. Condensation. Boiling. Binary and multi-component distillation, absorption, extraction.

821. Advanced Chemical Engineering Thermodynamics Fall, 3(3-0)

R: Open only to Chemical Engineering majors.

Laws of thermodynamics, unsteady state processes. Prediction and correlation of phase equilibria for nonelectrolytes. Relation of quantum theory and statistical mechanics to thermodynamic properties.

822. Advanced Transport Phenomena Spring, 3(3-0)

P: CHE 422.

Derivation of balance equations for mass, energy, and momentum. Constitutive equations for multicomponent fluids. Estimates of transport properties. Approximate models for turbulent and boundary layer flows. Boundary value problems.

831. Advanced Chemical Reaction Engineering Spring, 3(3-0)

P: CHE 341.

Characterization of solid catalysts. Heterogeneous reaction rate expressions. Simultaneous mass and heat transport and chemical reaction in porous catalysts. Design of fixed-bed and fluidized-bed reactors. Industrial catalytic reactions.

871. Material Surfaces and Interfaces

Fall of odd-numbered years. 3(3-0) Interdepartmental with Materials Science and Mechanics.

P: CEM 362 or MSM 351. R: Open only to Chemical Engineering, Materials Science, Chemistry, or Packaging majors.

Physical and chemical nature of solid surfaces and their interaction with gases, liquids, and other solids. Characterization of surfaces and solid-solid interfaces. Relation of surface and interfacial structure to engineering phenomena.

882. Advanced Biochemical Engineering Fall, 3(3-0)

P: CHE 481.

Microbial strain improvement. Metabolic engineering. Structured growth models. Non-ideal bioreactor performance. Biosensors and process control of bioreactors. Separation processes for biochemicals.

890. Independent Study

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors. Approval of department.

Supervised individual investigation of a problem in chemical engineering.

891. Selected Topics

Fall, Spring, Summer. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

Physical and mathematical analysis of phenomena such as swirling flows or stability of reactions and transport processes.

892. Seminar

Fall, Spring. 1(0-2) A student may earn a maximum of 4 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

Presentations of detailed studies on one or more specialized aspects of chemical engineering.

899. Master's Thesis Research

Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 24 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

972. Viscoelasticity and Flow of Polymeric Materials

Spring of odd-numbered years. 3(3-0)

P: CHE 801 or CHE 822.

Time dependent and steady flow properties of polymeric materials related to molecular and structural parameters. Examples of polymeric blends and composites with thermoplastic and thermoset components.

973. Advanced Polymer Reaction Engineering

Spring of even-numbered years. 3(3-0)

P: CHE 831. R: Open only to Chemical Engineering majors.

Principles of chain polymerization and network forming reactions. Emulsion and suspension polymerization versus graft reactions on bulk polymers. Reactor design. Morphology in polymer alloys, effects of mixing on polymer reactions.

999. Doctoral Dissertation Research

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 72 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

CHEMISTRY

CEM

Department of Chemistry College of Natural Science

141. General Chemistry

Fall, Spring. 4(4-0)

P: MTH 103 or MTH 110 or MTH 116 or concurrently. R: Not open to students with credit in CEM 152 or CEM 182H.

Atoms, molecules, ions; chemical calculations; reactions, energy changes; gases; periodic properties of elements; chemical bonds; states of matter, solutions; acids and bases; aqueous reactions and ionic equations.
