MEDICAL TECHNOLOGY

MT

Medical Technology Program College of Natural Science

Learning in the Biomedical Sciences

Fall. 1 credit. Not open to students with credit in NSC 201 or NSC 202.

Learning strategies appropriate for science. Development of critical thinking and problem solving. Group processes. Adapting study to personal learning styles and college instruction.

150 **Preview of Biomedical Research**

Spring. 1(1-0) Interdepartmental with Natural Science. Administered by Medical Technology.

Exploration of biomedical research careers. Biomedical research in the United States: funding, safety, regulatory agencies, ethics, experimental design, trouble-shooting, and data interpretation.

204 **Mechanisms of Disease**

Spring. 3(3-0) P:M: BS 111 or LBS 145 Pathophysiological mechanisms of diseases. lected applications to organ system pathology.

Application of Clinical Laboratory 213 Principles

Fall, Summer. 2(1-3) RB: BS 111L R: Open only to students in the Clinical Laboratory Sciences or Medical Technology or Human Biology major or LBS Medical Technology coordinate major.

Lab safety and standards of good laboratory practice including specimen handling and processing. Application of technologies and techniques to the performance of clinical diagnostic testing.

220 **Preparing for a Health Professions**

Spring. 1(1-0) R: Open only to freshmen or sophomores or juniors. SA: MT 212

Development of skills needed for success in health professions careers. Historical, economic, sociological and ethical perspectives on the U.S. health professions with focus on medical laboratory ca-

324 Fundamentals of Hematology, Hemostasis, and Urinalysis

Fall. 3(3-0) P:M: (BS 111 or concurrently) or (LBS 145 or concurrently)

Physiology and biochemistry of normal hematologic, hemostatic, and urinary systems. Principles of diagnostic assays to detect diseases affecting those

Introductory Laboratory in Hematology, 324L Hemostasis and Urinalysis

Fall. 1(0-3) P:M: MT 324 R: Open only to students in Clinical Laboratory Sciences. SA: MT 423

Routine laboratory assays used to assess the health of the hematological, hemostatic, and urinary systems.

416 **Clinical Chemistry**

Fall. 4(4-0) P:M: MT 213 and (BMB 401 or BMB 461) and (PSL 250 or PSL 432) RB: MT 417 and (CEM 332 or CEM 333)

Correlation of laboratory test results with normal physiology and biochemistry and with disease states. Metabolic and endocrine systems. Acquired and inherited diseases. Therapeutic drug monitoring, and toxicology.

Quality Processes in Diagnostic Labora-

tory Testing
Fall. 2(2-0) P:M: (STT 200 or concurrently) or (STT 201 or concurrently) or (STT 421 or concurrently) or (STT 351 or concurrently) or (STT 231 or concurrently) RB: MT 213 SA: MT 414

Statistical methods for validating diagnostic laboratory tests including quality control processes, proficiency testing, method evaluation, related regulatory requirements, laboratory information systems, and laboratory mathematics.

Advanced Hematology, Hemostasis and Urinalysis

Spring. 2(2-0) P:M: MT 324 SA: MT 422 Etiology and pathogenesis of diseases of the hematologic, hemostatic and urinary systems including anemias, leukemias, and hemophilias. Diagnostic testing for such diseases.

Advanced Laboratory in Hematology, 424L Hemostasis, and Urinalysis

Spring. 1(0-3) P:M: (MT 424 or concurrently) SA: MT 423

Specialized and advanced assays used in the diagnosis of diseases of the hematological, hemostatic, and urinary systems.

430 **Molecular Laboratory Diagnostics**

Spring. 2(2-0) P:M: (BMB 401) or (BMB 461 and BMB 462) and (BS 111 or LBS 145)

Concepts and principles of molecular analysis applied to medical diagnostics and related applications.

433 Clinical Immunology and Immunohematology Laboratory Spring. 1(0-3) P:M: (MT 213 and MT 435 or

concurrently) R: Open only to students in the Clinical Laboratory Sciences major.

Immunologic methods for disease detection. Me-

thods of blood typing and pre-transfusion testing.

434 **Clinical Immunology**

Fall. 3(3-0) P:M: (BS 111 or concurrently) or LBS 145 or LBS 149H or LBS 159H SA: MT 432 Not open to students with credit in MMG 451.

Concepts of innate, cellular, and humoral immunity. Immunodeficiency and autoimmunity. Principles and applications of immunoassays in medical labor-

435 **Transfusion and Transplantation** Medicine

Spring. 3(3-0) P:M: (MT 434 or MMG 451) SA: MT 432

Principles and practice of transfusion medicine including blood typing. Principles and practices of transplantation medicine. Transplantation immunology, organ procurement, and rejection detection.

436 **Principles of Diagnostic Molecular** Science

Spring. 2(2-0) P:M: BMB 461 and BS 111 and ZOL 341 Not open to students with credit in MT 830. C: BMB 462 concurrently.

Principles and techniques of molecular diagnostic assays including applicable regulations.

Clinical Applications of Diagnostic 437 Molecular Science

Spring. 2(2-0) P:M: MT 436 Not open to students with credit in MT 831.

Application of molecular diagnostic methods in clinical and other types of laboratory disciplines.

438 **Molecular Diagnostic Laboratory**

Fall. 2(0-6) P:M: MT 436 Not open to students with credit in MT 832.

Laboratory in molecular techniques with emphasis on clinical and diagnostic applications.

Education and Management in the

Clinical Laboratory
Spring. 3(3-0) P:M: (MTH 116 or LBS 117) or (MTH 103 and MTH 114) or (STT 200 or STT 201 or STT 231 or STT 351 or STT 421) R: Open only to students in the Clinical Laboratory Sciences major.

Basic principles and concepts in education and management in clinical laboratories. Systematic approach to instructional design, delivery and evaluation. Principles of leadership, personnel management, fiscal management, and regulatory compliance.

450 **Eukaryotic Pathogens**

Spring. 3(3-0) P:M: BS 111 RB: MMG 205 or MMG 301

Medically important fungi and parasites. parasite relationships, life cycles, culture, identification, and associated diseases.

455 Integrating Clinical Laboratory Science Discipline (W)

Fall, Spring. 2(2-0) P:M: ((MT 324 or concurrently) and (MT 417 or concurrently) and (MT 416 or concurrently) and (MMG 463 or concurrently) and (MT 435 or concurrently) and (CEM 332 or concurrently)) and completion of Tier I writing requirement R: Open only to seniors in the Medical Technology major or Clinical Laboratory Sciences undergraduate major.

Problem oriented approach integrating topics from Medical Technology courses with emphasis on writing experience in the major and on critical thinking skills.

Advanced Clinical Chemistry Laboratory Fall, Spring, Summer. 3 credits. P:M: CEM

Application and integration of theory and technical skills in clinical chemistry and biochemistry.

472 **Advanced Clinical Chemistry**

Fall, Spring, Summer. 1 credit. R: Open only to seniors in the Clinical Laboratory Sciences major. C: MT 471 concurrently.

Theoretical aspects of clinical chemistry, chemical and biochemical reactions, statistical analysis, and pathophysiologic relationships. Integration of cognitive material with clinical laboratory test results.

Medical Technology—MT

473 **Advanced Clinical Hematology and Body** Fluids Laboratory

Fall, Spring, Summer. 3 credits. P:M: MT

Application and integration of theory and technical skills in hematology, hemostasis, and body fluid analysis.

474 **Advanced Clinical Hematology and Body Fluids**

Fall, Spring, Summer. 1 credit. R: Open only to seniors in the Clinical Laboratory Sciences major. C: MT 473 concurrently.

Theoretical aspects of advanced hematology, hemostasis and body fluid analysis. Integration of cognitive material with clinical laboratory test results.

475 **Advanced Clinical Immunology and** Immunohematology Laboratory

Fall, Spring, Summer. 2 credits. P:M: MT

Application and integration of theory and technical skills in immunology and immunohematology.

Advanced Clinical Immunology and Immunohematology

Fall, Spring, Summer. 1 credit. R: Open only to seniors in the Clinical Laboratory

Sciences major. C: MT 475 concurrently.

Theoretical aspects of immunology and immunohematology. Integration of cognitive material with clinical laboratory test results.

Advanced Clinical Microbiology 477 Laboratory

Fall, Spring, Summer. 3 credits. P:M: MMG 464 and MT 450

Application and integration of theory and technical skills in clinical microbiology and infectious disease.

Advanced Clinical Microbiology

Fall, Spring, Summer. 1 credit. R: Open only to seniors in the Clinical Laboratory Sciences major. C: MT 477 concurrently.

Theoretical aspects of clinical microbiology and infectious disease. Integration of cognitive material with clinical laboratory test results.

479 Professional Behavior in Clinical **Laboratory Science**

Fall, Spring, Summer. 1(0-2) P:M: (MT 220 and MT 442) and ((MT 471 or concurrently) or (MT 473) or concurrently) or (MT 475 or concurrently) or MT 477)

Application of professional behavior principles to

practical experiences in clinical laboratory science.

Advanced Diagnostic Molecular Science

Spring. 2 credits. R: Open only to students in the Diagnostic Molecular Science major. C: MT 483 concurrently or MT 484 concurrently or MT 485 concurrently or MT 486 concurrently.

Integration of principles and concepts in diagnostic molecular science with diagnostic laboratory test results.

483 Molecular Diagnostic Experience in Hematopathology and Oncology

Spring. 2 credits. P:M: MT 438 or concurrently R: Open only to students in the Diagnostic Molecular Science major. C: MT 482 concurrently.

Clinical experience in molecular diagnostic laboratories with applications in hematopathology and oncology

484 Molecular Diagnostic Experience in Infectious Disease

Spring. 2 credits. P:M: MT 438 or concurrently R: Open only to students in the Diagnostic Molecular Science major. C: MT 437 concurrently.

Clinical experience in molecular diagnostic laboratories with applications to infectious disease diagno-

485 Molecular Diagnostic Experience in Inherited and Predictive Genetics

Spring. 2 credits. P:M: MT 438 or concurrently R: Open only to students in the Diagnostic Molecular Science major. C: MT 482 concurrently.

Clinical experience in molecular diagnostic laboratories with applications in inherited and predictive

486 Molecular Diagnostic Experience in Genotyping and Individual Identification

Spring. 2 credits. P:M: (MT 437 or concurrently) and MT 438 R: Open only to students in the Diagnostic Molecular Science major. C: MT 482 concurrently.

Clinical experience in molecular diagnostic laboratories with applications to genotyping and identification of individuals.

495 **Directed Study**

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to students in the Clinical Laboratory Sciences or Medical Technology major or LBS Medical Technology coordinate major.

Faculty directed study including assigned readings, reviews of appropriate scientific periodicals, research and laboratory experience.

Integrative Correlations in Clinical 496 Laboratory Science I

Fall, Spring. 1(2-0) P:M: MT 213 R: Open only to juniors or seniors in the Medical Technology major or Clinical Laboratory Science major or Lyman Briggs Medical Technology coordinate major or Lyman Briggs Clinical Laboratory Sciences coordinate major.

Application of the principles and concepts of clinical laboratory science in a problem-based learning format. Ethics, diagnostic value of laboratory tests, social-economic impact of laboratory tests and their regulation.

Integrative Correlations in Clinical Laboratory Science II

Fall, Spring. 1(2-0) P:M: MT 496 R: Open only to juniors or seniors in the Medical Technology major or Clinical Laboratory Science major or Lyman Briggs Medical Technology coordinate major or Lyman Briggs Clinical Laboratory Science coordinator major.

Continuation of MT 496.

Integrative Correlations in Clinical Laboratory Science III

Spring. 2(1-2) P:M: (MMG 463 or concurrently) and (MMG 464 or concurrently) and MT 496 R: Open only to students in the Clinical Laboratory Sciences major. SA: MT

Continuation of MT 496 with emphasis on cases of medical microbiology, hematology, and clinical chemistry.

801 **Medical Technology Seminar**

Spring. 1(1-0) A student may earn a maximum of 2 credits in all enrollments for this course. R: Open only to graduate students in the Clinical Laboratory Sciences major.

Current research topics in clinical laboratory sciences

820 **Advanced Human Hematology**

Spring of odd years. 2(2-0) Interdepartmental with Pathology. Administered by Medical Technology. RB: MT 424

Pathogenesis, mechanisms, and morphological pictures. Laboratory tests and interpretation of re-

830 Concepts in Molecular Biology

Fall, Spring. 2(2-0) Interdepartmental with Pathobiology and Diagnostic Investigation. Administered by Medical Technology. RB: One course in biochemistry or concurrently.

Techniques and theories of molecular biology, nucleic acid synthesis and isolation, enzymatic digestion and modification, electrophoresis, hybridization, amplification, library construction, and clon-

831 Clinical Application of Molecular Biology

Spring, Summer. 2(2-0) P:M: MT 830 RB: Basic biochemistry, medical or research laboratory experience

Molecular diagnostic principles. Diagnostic outcomes in traditional and non-traditional laboratory disciplines.

832 **Molecular Pathology Laboratory**

Summer. 2(0-4) P:M: MT 831 or concurrently SA: MT 831L

Equipment operation, DNA extraction and measurement, electrophoresis, hybridization and transfers, amplification and detection including techniques and automated sequencing. Clinical applications.

842 Managing Biomedical Laboratory Operations

Fall. 2(2-0) R: Open only to students in the Biomedical Laboratory Operations major or approval of department.

Integration of the roles of legislative, regulatory, technological and economic factors that influence the practice and management of biomedical laboratory operations.

844 **Topics in Biomedical Laboratory** Operations

Spring. 1(1-0) P:M: MT 842 R: Open only to students in the Biomedical Laboratory Operations major or approval of department.

Current issues relevant to biomedical laboratory operations from an interdisciplinary perspective with an emphasis on efficient laboratory operations.

846 **Decision Processes for Biomedical Laboratory Operations**

Fall. 2(2-0) P:M: MT 842 R: Open only to students in the Biomedical Laboratory Op-

erations major or approval of department.

Integrative case studies presented in a problembased learning format. Strategies for decision making in the operations of a biomedical laboratory. Cases integrate scientific principles, management principles and regulatory factors.

850 Concepts in Immunodiagnostics

Fall, Spring. 2(2-0) RB: An undergraduate course in biochemistry or cell biology. Immunology principles and theory applied to diagnostic evaluation of the host immune response during health and disease.

851 Clinical Application of Immunodiagnostic Principles

Spring, Summer. 2(2-0) P:M: MT 850
Immunodiagnostic theories and principles applied to clinical assay development and method evaluation.

852 Immunodiagnostics Laboratory

Summer. 2(2-0) SA: MT 851L
Performance of immunopurifications, in vitro diagnostic assays and basic flow cytometry. Data analysis and quality control evaluation.

860 Clinical Laboratory Diagnosis of Infectious Diseases Fall of odd years. 2(2-0) Interdepartmental

Fall of odd years. 2(2-0) Interdepartmental with Pathology. Administered by Medical Technology. RB: MMG 451 and MMG 464 Laboratory techniques for diagnosing infectious

Laboratory techniques for diagnosing infectious diseases in humans. Emphasis on differential diagnosis and correlation of microbiological results with serology, hematology, and clinical chemistry.

890 Selected Problems in Clinical Laboratory Science

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open only to graduate students in the Clinical Laboratory Sciences major.

Non-thesis research for Plan B master's students.

895 Projects in Biomedical Laboratory Operations

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to students in the Biomedical Laboratory Operations major or approval of department.

Students complete a significant on-site project in cooperation with an industrial/clinical partner.

899 Master's Thesis Research

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open only to graduate students in the Clinical Laboratory Sciences major.

Master's thesis research.
