# PHYSIOLOGY

# **PSL**

# Department of Physiology College of Natural Science

### 250 Introductory Physiology

Fall, Spring. 4(4-0) R: Not open to students in the Physiology major. Not open to students with credit in PSL 310.

Function, regulation and integration of organs and organ systems of higher animals emphasizing human physiology.

## 310

Physiology for Pre-Health Professionals Fall. 4(4-0) P: BS 161 or BS 181H or LB 145 or ANTR 350 Not open to students with credit in PSL 250 or PSL 431 or PSL 432.

Fundamental concepts of human physiology with an emphasis on physiology related to health careers.

## Computational Problem Solving in Physiology

Fall, Spring, Summer. 3(3-0) P: PSL 431 RB: PSL 432 R: Open to juniors or seniors.

Quantitative analysis of physiological data: mathematical models, curve fitting, data analysis and interpretation. Problem solving involving exponential and logistic growth. Cerebral blood flow, convective cooling, oxygen consumption, thermoregulation, other applications.

## 420 Membrane Biophysics: An Introduction

Summer. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: CEM 252 and PHY 231 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major or approval of department.

Biophysical and chemical aspects of biomembranes. Experimental model membrane systems including planar lipid bilayers and liposomes. Biotechnological applications of lipid bilayer sensors.

## 421 Adult and Embryonic Stem Cells (W)

Spring of even years. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Topics in the physiology, cell biology, genetics, and developmental potential of adult and embryonic stems cells.

## 425 **Physiological Biophysics**

Fall. 3(3-0) P: PSL 250 or PSL 310 or PSL 431 RB: College Algebra, Differential Calcu-

The quantitative physical phenomena underlying kinetics and equilibria of physiological processes.

## 426 Computational Problem Solving in Physiology II (W)

Fall, Spring, Summer. 2(2-0) P: (PSL 410 and PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Lyman Briggs Physiology Coordinate Major or in the Physiology major. Approval of department.

Present advanced computational and computer programming strategies and techniques appropriate to problem solving in biology, physiology and medi-

## Human Physiology I 431

Fall. 3(3-0) P: (BS 161 or BS 181H or LB 145) and (CEM 142 or CEM 152 or CEM 182H or LB 172) RB: BS 162 or BS 182H or LB 144 R: Open to juniors or seniors.

Molecular basis of physiological control systems, neural function including autonomic nervous system, and cardiovascular and respiratory systems.

## **Human Physiology II**

Spring. 3(3-0) P: (BS 161 or BS 181H or LB 145) and (CEM 142 or CEM 152 or CEM 182H or LB 172) and PSL 431 RB: BS 162 or BS 182H or LB 144 R: Open to juniors or seniors

Continuation of PSL 431. Function and regulation of the digestive, endocrine, renal, and reproductive systems. Integration of physiological responses.

## Special Topics in Physiology (W)

Fall. 2(2-0) A student may earn a maximum of 4 credits in all enrollments for this course. P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Lyman Briggs Physiology Coordinate Major or in the Physiology major.

Special topics in physiology, focusing on the process of biomedical discovery, alternative medicine, autoimmunity, or other selected topics of interest related to careers in health care or biomedical research.

## Topics in Cell Physiology (W) 440

Spring. 2(2-0) A student may earn a maximum of 4 credits in all enrollments for this course. P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in mammalian cell physiology related to cell energetics and metabolism, molecular and cellular biology, cell growth and differentiation, or molecular physiology and functional genomics.

# Topics in Endocrinology (W)

Fall. 2(2-0) P: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics on the role of hormones in the requlation of growth, metabolism, differentiation, and physiological homeostasis.

## Topics in Cardiovascular Physiology (W) 442

Fall. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in the physiology of the heart and cardiovascular system.

# Topics in Respiratory Physiology (W)

Spring of odd years. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 and BMB 461 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Contemporary topics in lung airway, alveolar, and general respiratory physiology.

# Topics in Reproductive Physiology (W)

Spring of odd years. 2(2-0) P: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in the physiology of the reproductive system.

## Topics in Environmental Physiology (W) 445

Spring of odd years. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topic in environmental physiology with an emphasis on thermoregulation.

# Topics in Sensory Physiology (W)

Spring of even years. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topic in the functioning of the visual system, auditory system, or other sensory systems in health and disease.

## Topics in Brain Function (W) 447

Summer. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics on structure and function of the mammalian brain.

## 448 Topics in Gastrointestinal Physiology

Fall. 2(2-0) P: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in the physiology of the digestive system.

## 449 Topics in Neurophysiology and Neural Development (W)

Fall. 2(2-0) P: (PSL 431) or completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate

Selected topics in neurophysiology, including development of the nervous system in invertebrate and

## Physiology in Health and Disease 450

Fall. 3(3-0) P: (PSL 431 and PSL 432) and Completion of Tier I Writing Requirement R: Open to juniors or seniors in the Lyman Briggs Physiology Coordinate Major or in the Physiology major.

Advanced topics in normal and abnormal physiology. Chronic diseases, disease progression, and animal models of disease.

**Capstone Laboratory in Physiology**Fall, Spring, Summer. 2(1-3) P: PSL 431 RB: PSL 432 R: Open to juniors or seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Laboratory exercises in animal and human physiology, including cardiovascular and respiratory function, nerve and muscle function, osmoregulation receptor-mediated regulation, neural and hormonal

## 480 Special Problems in Physiology

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 8 credits in all enrollments for this course, RB: (PSL 431 and PSL 432) and completion of Tier I Writing requirement R: Open to undergraduate students in the Physiology major. Approval of department.

Independent study under the supervision of a faculty member.

## **Environmental Physiology (W)** 483

Spring. 4(4-0) Interdepartmental with Zoology. Administered by Zoology. P: ((BS 161 or LB 145 or BS 181H) and completion of Tier I writing requirement) and (BS 162 or LB 144 or BS 182H) and (CEM 141 or CEM 151 or CEM 181H or LB 171)

Aspects of physiology important to the environmental relations of vertebrates and invertebrates: energetics, thermal relations, osmotic-ionic relations, and exercise physiology.

## 490 Independent Research in Physiology

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 8 credits in all enrollments for this course. RB: PSL 431 and PSL 432 R: Open to undergraduate students in the Physiology major. Approval of department.

Supervised laboratory research in physiology under the direction of a faculty member.

### 513 **Animal Physiology for Veterinarians**

Spring. 4(4-0) R: Open to graduateprofessional students in the College of Veterinary Medicine.

Physiology of the neural, cardiovascular, renal, respiratory, digestive, endocrine, and reproductive systems, and thermoregulation.

## Cell Biology and Physiology I 534

Fall. 3 credits. Interdepartmental with Human Anatomy and Biochemistry and Molecular Biology. Administered by Physiology. R: Open only to graduate-professional students in the College of Human Medicine or College of Osteopathic Medicine.

Modern concepts of cell biology as a basis for understanding the physiology of human tissues and organ systems in health and disease.

## 535 Cell Biology and Physiology II

Spring. 4 credits. Interdepartmental with Human Anatomy and Biochemistry and Molecular Biology. Administered by Physiology. R: Open only to graduate-professional students in the College of Human Medicine or the College of Osteopathic Medicine.

Modern concepts of cell biology as a basis for un-derstanding the physiology of human tissues and organ systems in health and disease. Continuation of PSI 534

### 552 **Medical Neuroscience**

Spring. 4(3-2) Interdepartmental with Human Anatomy and Neurology and Ophthalmology and Radiology. Administered by Neurology and Ophthalmology. R: Open only to graduate-professional students in the Colleges of Human Medicine and Osteopathic Medicine. SA: ANT 552

Correlation of normal structure and function of the human nervous system with clinical testing, classical lesions, and common diseases.

## 611 Research Problems in Physiology Clerkship

Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: (PSL 511) and Completion of Semester 5 in the graduate professional program in the College of Veterinary Medicine.

Individual work on a research problem.

### 825 **Cell Structure and Function**

Spring. 3(3-0) Interdepartmental with Biochemistry and Molecular Biology and Microbiology and Molecular Genetics. Administered by Biochemistry and Molecular Biology. RB: BMB 401 or BMB 461. SA: BCH

Molecular basis of structure and function. Cell properties: reproduction, dynamic organization, integration, programmed and integrative information transfer. Original investigations in all five kingdoms.

# Physiology and Pharmacology of Excitable Cells 827

Fall. 4(4-0) Interdepartmental with Neuroscience and Pharmacology and Toxicology and Zoology. Administered by Pharmacology and Toxicology. RB: PSL 431 or PSL 432 or BMB 401 or BMB 461 or ZOL 402

Function of neurons and muscle at the cellular level: membrane biophysics and potentials, synaptic transmission, sensory nervous system function.

### 828 Cellular and Integrative Physiology

Spring. 4(4-0) RB: PSL 827

Cellular physiology as basis for understanding integrative functions of various body systems, including nervous, cardiovascular, respiratory, urinary, gastrointestinal, endocrine, reproductive, and immune.

## **Systems Neuroscience**

Spring. 4(4-0) Interdepartmental with Hu-man Anatomy and Neuroscience and Phar-macology and Toxicology and Psychology and Zoology. Administered by Neuroscience. R: Open only to graduate students in the Colleges of Human Medicine, Osteopathic Medicine, Agriculture and Natural Resources, Natural Science, Social Science, and Veterinary Medicine. SA: ANT

Anatomy, pharmacology, and physiology of multicellular neural systems. Sensory, motor, autonomic, and chemo-regulatory systems in vertebrate brains.

# **Vertebrate Neural Systems**

Spring of odd years. 3(2-2) Interdepartmental with Human Anatomy and Neuroscience. Administered by Neuroscience. SA:

Comparative analysis of major component systems of vertebrate brains. Evolution, ontogeny, structure, and function in fish, amphibians, reptiles, birds and mammals.

# Master's Thesis Research

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 36 credits in all enrollments for this course

Master's thesis research.

# Investigating the Lung

Fall of even years. 2(2-0) Interdepartmental with Large Animal Clinical Sciences and Pathobiology and Diagnostic Investigation. Administered by Large Animal Clinical Sciences. R: Open to graduate students.

Integrative biology of the lung. Structure and function. Molecular, cellular, and organ responses to injury.

### 910 Cellular and Molecular Physiology

Fall. 4(4-0) RB: BMB 802; PSL 432 or PSL 501 or PSL 511; one calculus course. R: Open only to graduate students in the Department of Physiology or Department of Pharmacology and Toxicology.

Readings in cell physiology and physiological aspects of molecular biology.

### 950 **Topics in Physiology**

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Approval of

Classical and modern concepts in selected areas of physiology.

**Problems in Physiology**Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course. R: Approval of department.

Individual research problems in physiology.

## **Doctoral Dissertation Research** 999

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 120 credits in all enrollments for this course.

Doctoral dissertation research.
